Promoting best practices in eCommerce to customers worldwide.

ROLE	PROJECT TIMELINE	PROJECT TOOLKIT	PROJECT CONTRIBUTION
Product Designer	10 Weeks	Sketch, Figma, & InVision	Design Systems, Research, Wireframes, Prototyping & Product Design
COLLABORATOR	 <b>James Heffernan</b> ↗ Senior Design Manager, Global Product Design		

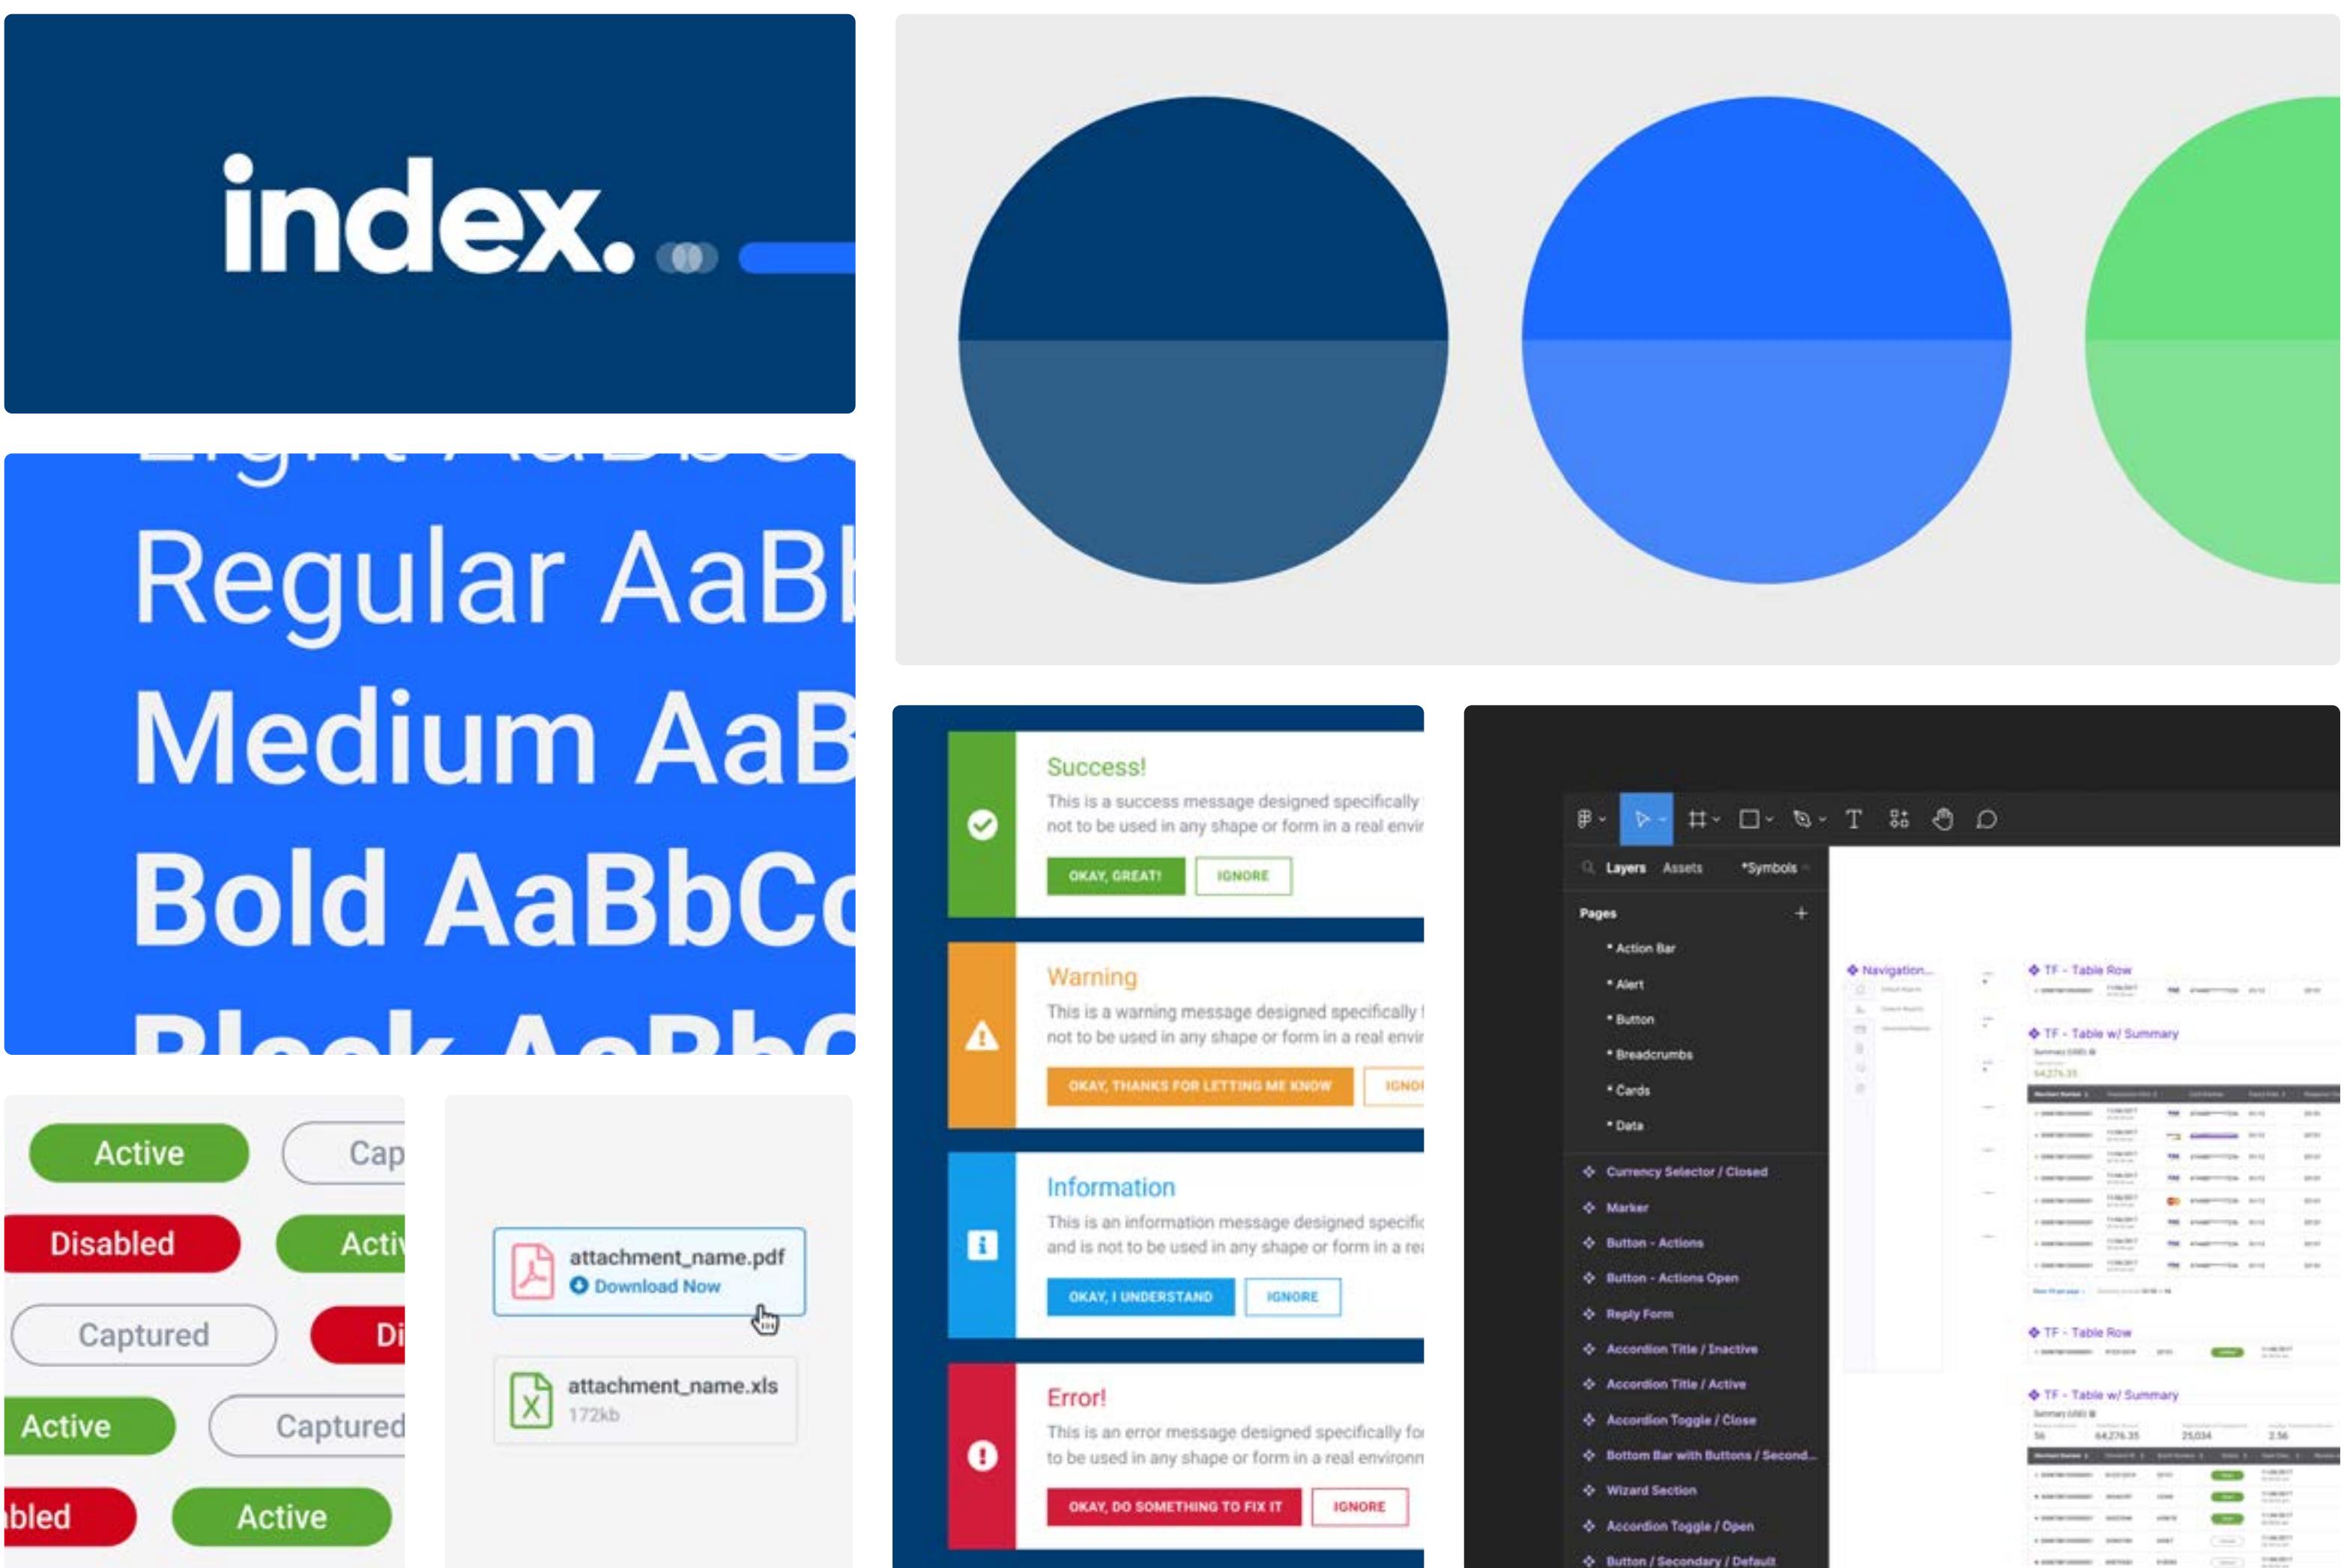

Checkout Hero is a B2B product that promotes best practices in eCommerce to its customers worldwide. It acts as a central hub that hosts articles curated and made by the experts at Global Payments, currently categorised into four pillars; security, UX, conversion, and mobile.

Checkout Hero was previously a Realex Payments product prior to its acquisition by Global Payments in 2015. I was delegated as the sole designer and participated in the whole UX design process of redesigning and improving the product in tandem with the work I'm doing for Global Payments' design system.

## Contributing to the Design System

At Global Payments, I was heavily involved in the development of [Index](#), Global Payments' engineering & product design system.

I did an initial audit of all the products within the Global Payments portfolio, identifying and exporting key patterns and elements which would later be hosted on an internal microsite that gives a high-level overview to further the development of the design system.

# Defining the Problem

## Going Through the Hoops

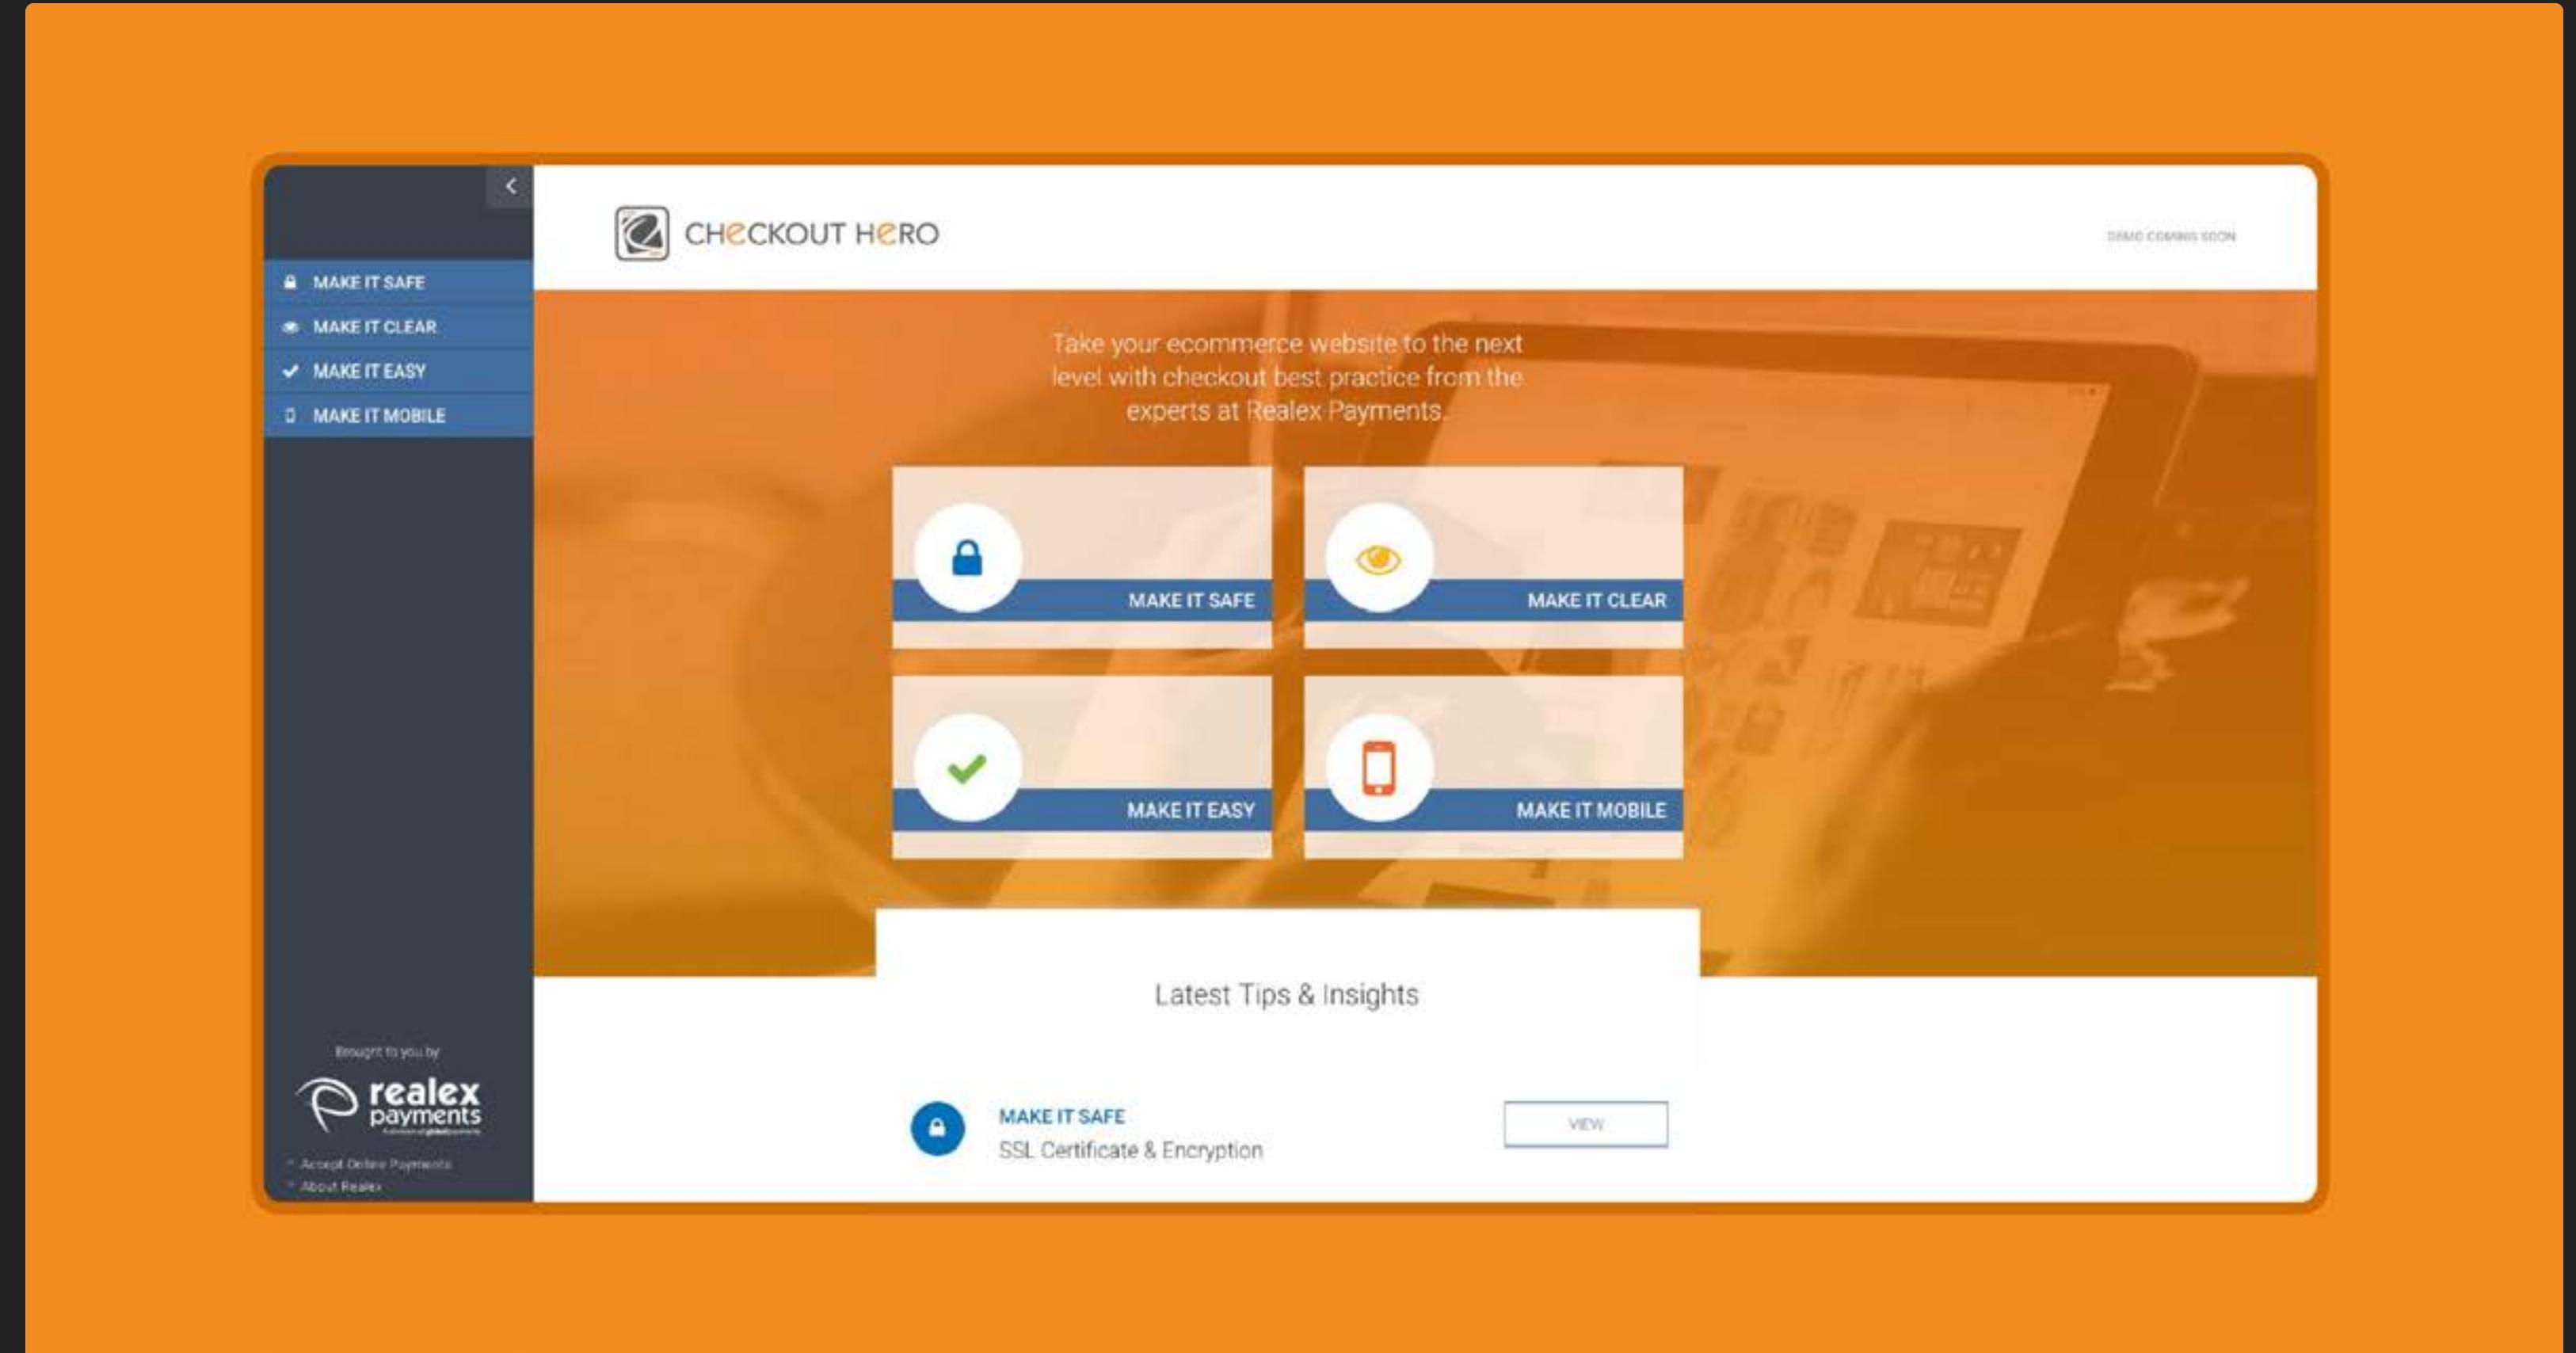

Though the product contains multiple articles, these are not separated into their own individual pages. Users would have to *go through the hoops* to get to the content their looking for.

## Legacy Design

The website has not been redesigned since Global Payment's acquisition of Realex Payments, and currently does not follow the current brand guidelines.

## Where am I supposed to go?

The lack of an indexing system causes restrictions and requires users to take extra steps to get to the content most relevant to them.

• CHECKOUT HERO LEGACY BUILD [2019]

## Solutions

**Fresh Coat of Paint, And a Whole Load of Work**

With a brand-new look, Checkout Hero is visually overhauled with a responsive web design approach and variable typography.

**Putting Ourselves Front and Centre**

We know payments, and we are here to take you along the journey to bring your business to the next level.

**Trending Articles**

**SSL Certificate & Encryption**  
Showcase a secure online payment process through SSL, a security technology which encrypts personal transaction details.

**Clear Checkout Process**

**CHAPTERS**

**Make it Safe**  
Instil trust and communicate that purchasing from your website is safe and secure.

**Introducing Chapters**  
Chapters are our solution to categories. All your articles are now in their respective spaces.

# Process

**Persona Development and Analysis**

We've identified and refined a persona on which we will shift focus on for our project. We put ourselves into their shoes and try to understand their needs, pain points, scenarios, and identifying the key goals of the users when using the product.

**Competitive Benchmarking**

Looking at similar products on the market highlighting their overall information architecture, navigation system, managing multiple mediums of information, use of multiple colours and typefaces, and its relationship to its parent if any.

## Considerations & Recommendations

### CONSIDERATIONS

Our Persona wants to make his business feel trustworthy & build credibility through association. At a glance, the content seems relevant to them, but they are still determining how this will benefit them in the long run.

### RECOMMENDATIONS

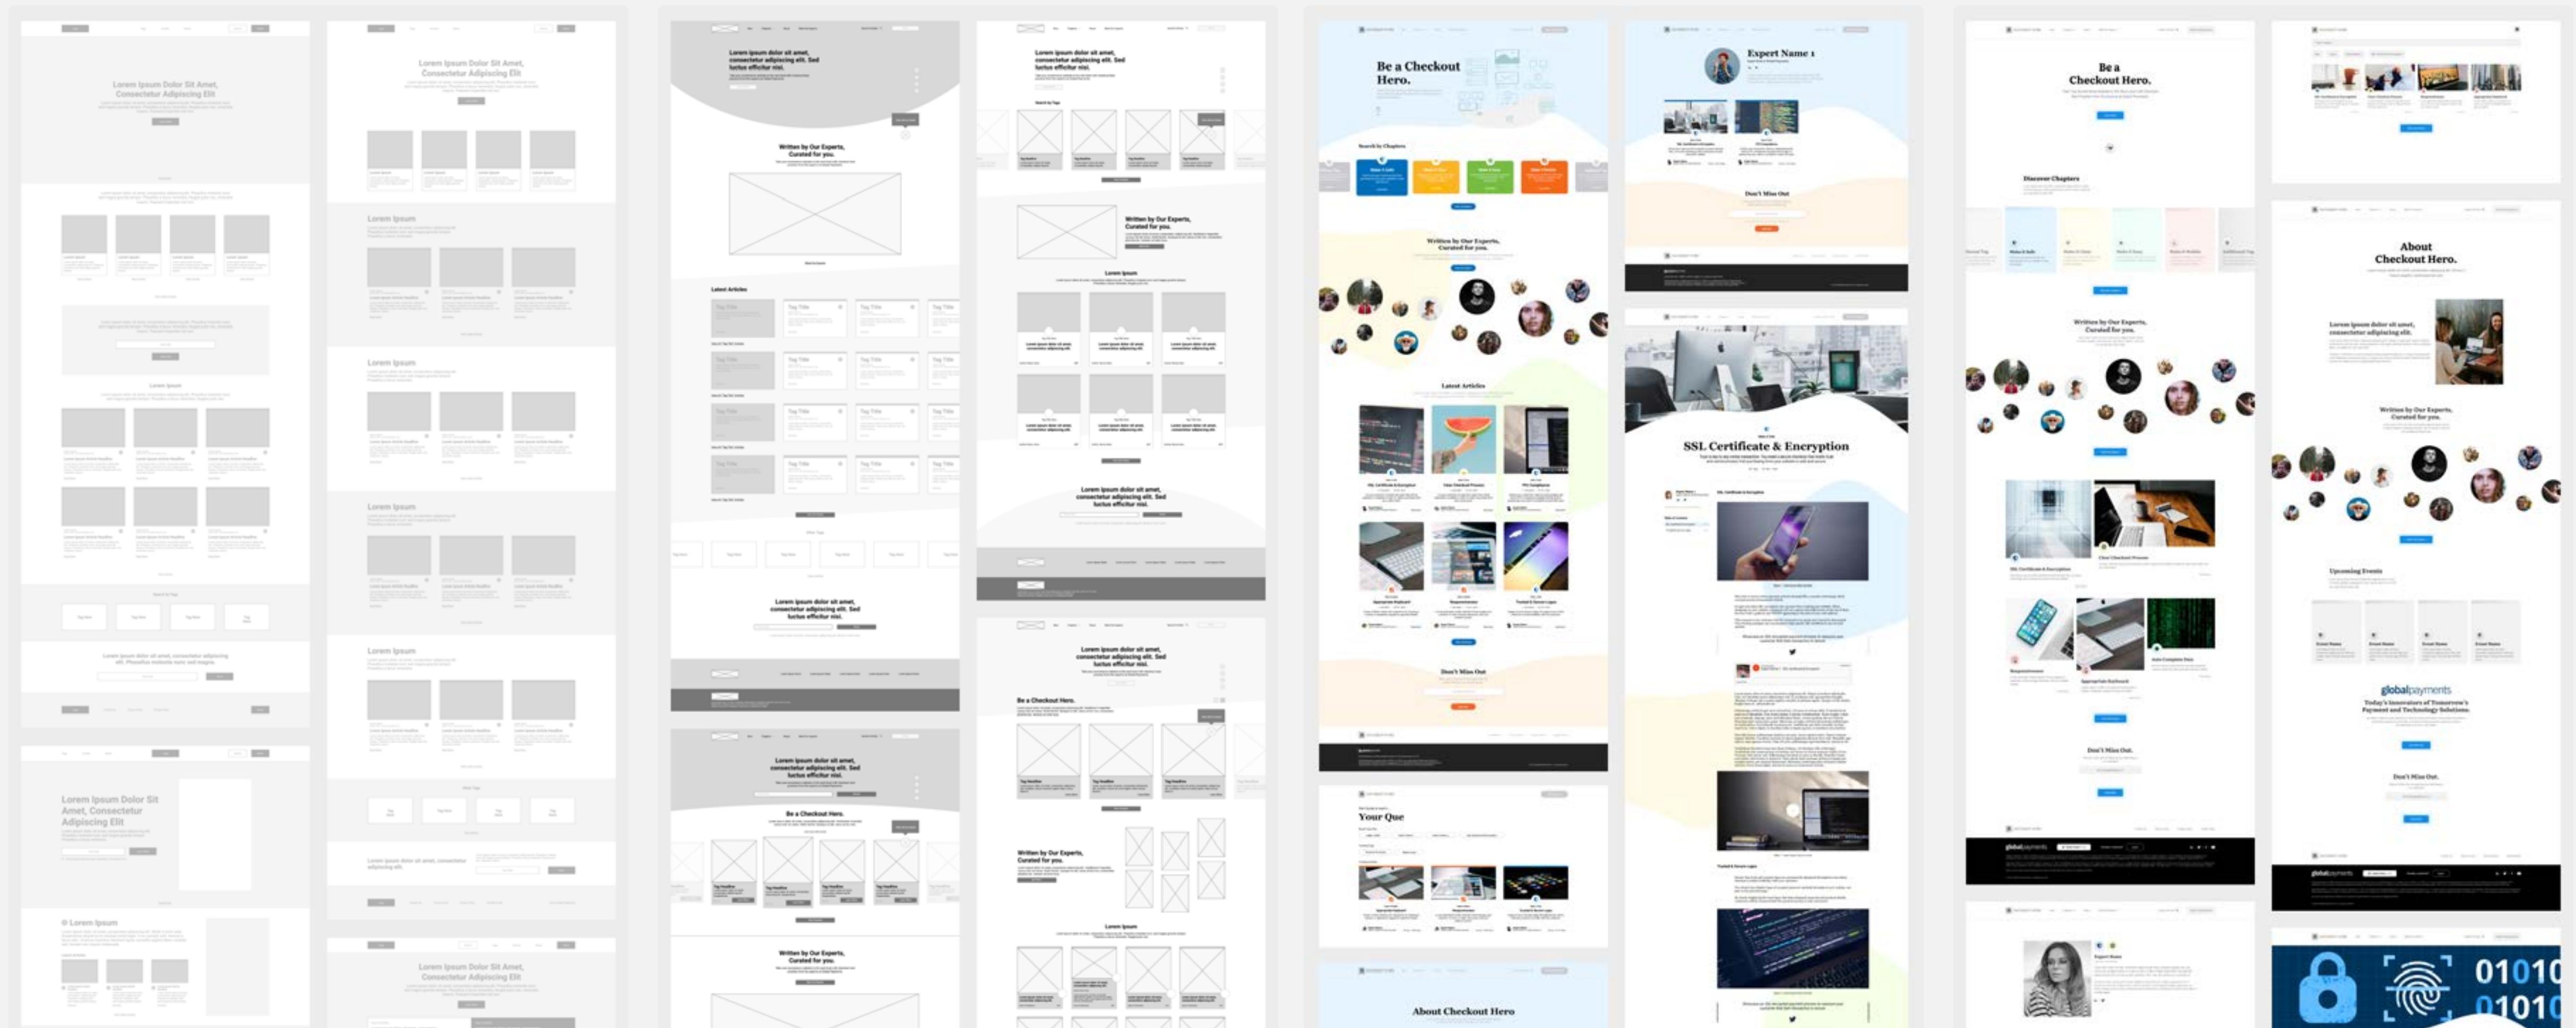

Have the product be visually aligned with the other products within the portfolio. Putting the most relevant content front and centre.

### CONSIDERATIONS

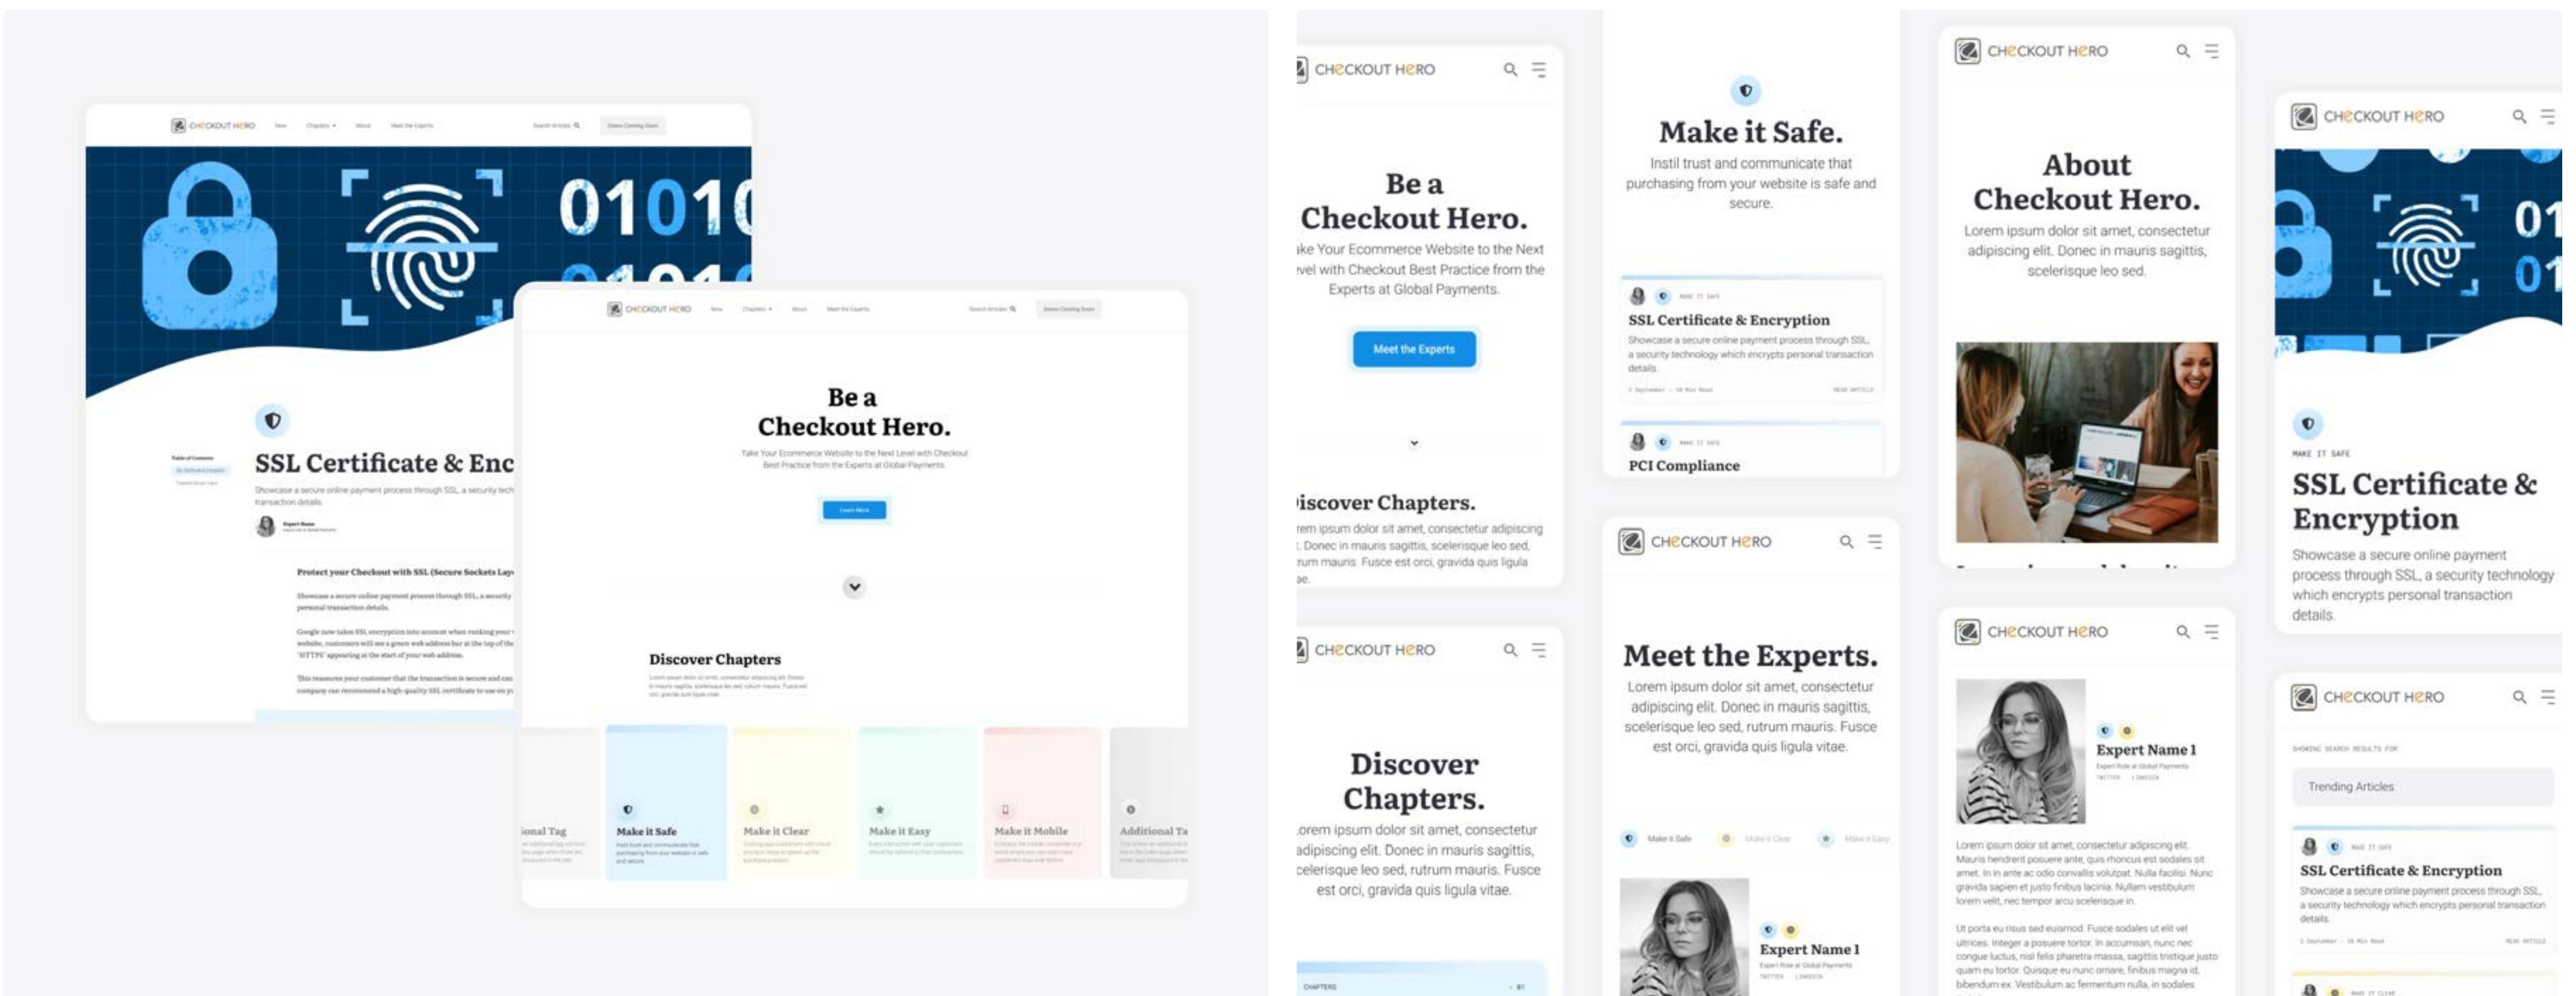

As a business owner, our Persona understands that trust is key to running a successful business. They are also very wary of things they see on the internet and feel much more comfortable if they can speak to someone on the topics they've read.

### RECOMMENDATIONS

Allow users to connect with the experts through social media or email. Provide references and reading recommendations, similar to a dissertation.

## Design Iterations

The newly redesigned Checkout Hero features an all-new colour palette from Index, with its subtle use of tints, and the introduction of Literata to the library.

**CH H1 GLOBAL**

Typography styling for H1 components on Checkout Hero. Used on hero sections globally.

**My H1 would look something like this.**

Literata Bold - 68px Font |

**CH H2 GLOBAL**

Typography styling for H2 components on Checkout Hero. Used on section containers globally.

**My H2 would look something like this.**

Literata Bold - 39.81px Font |

The image displays a design system interface from Figma. On the left, there's a component library with cards for 'Content Here' and 'Discover More'. On the right, a sidebar shows a list of global styles under 'Design' tab:

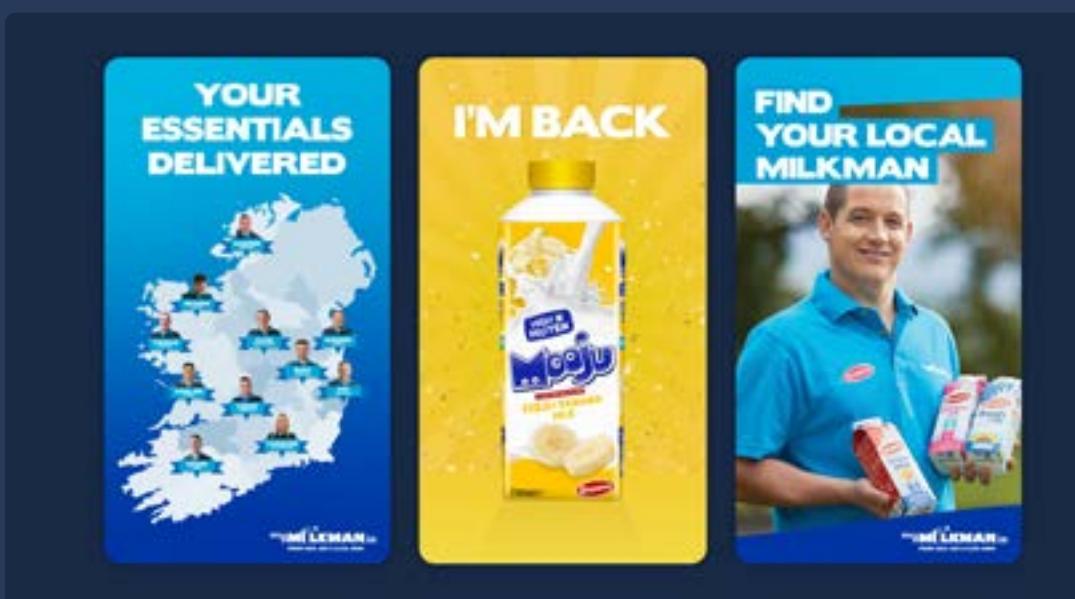

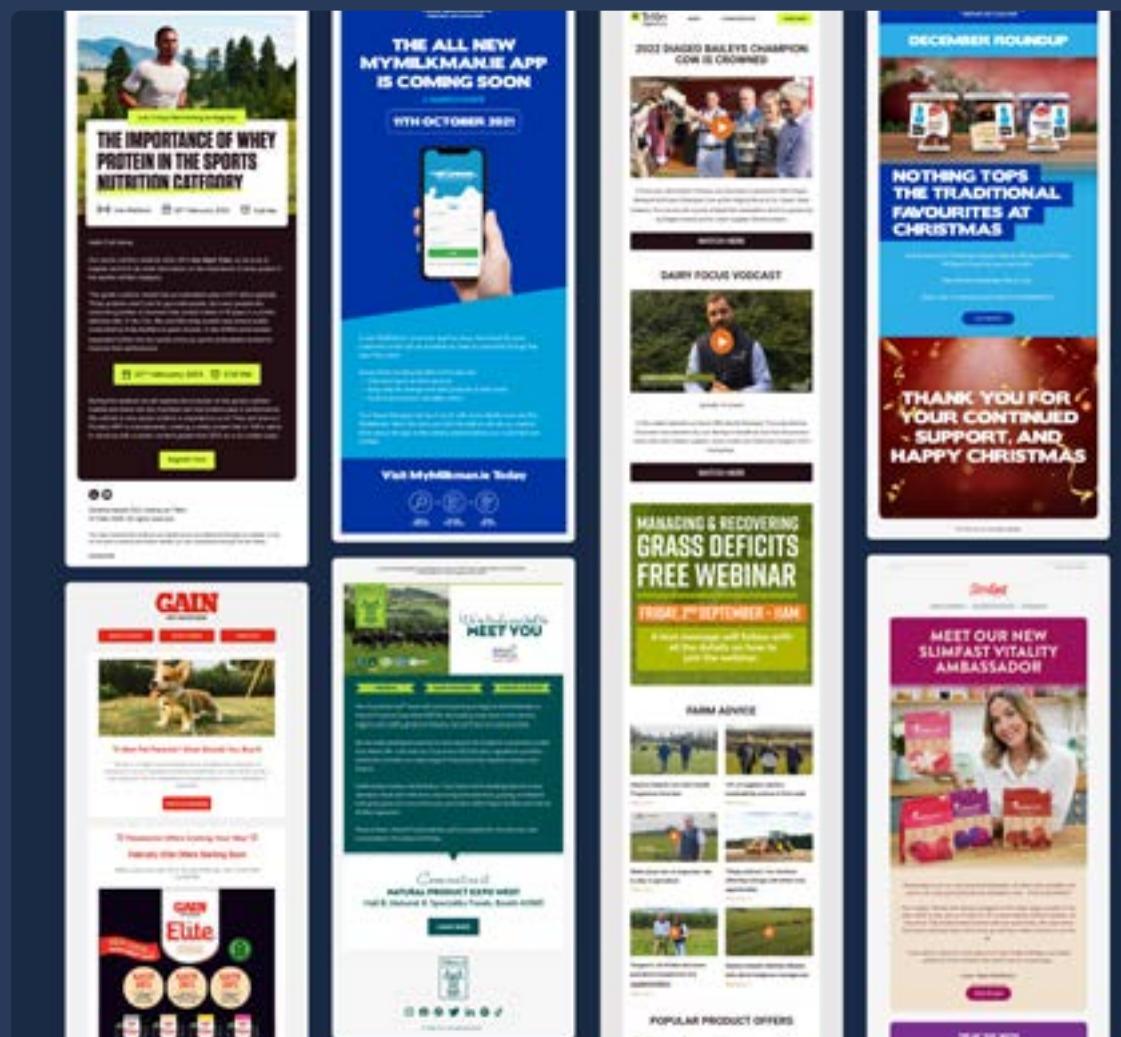

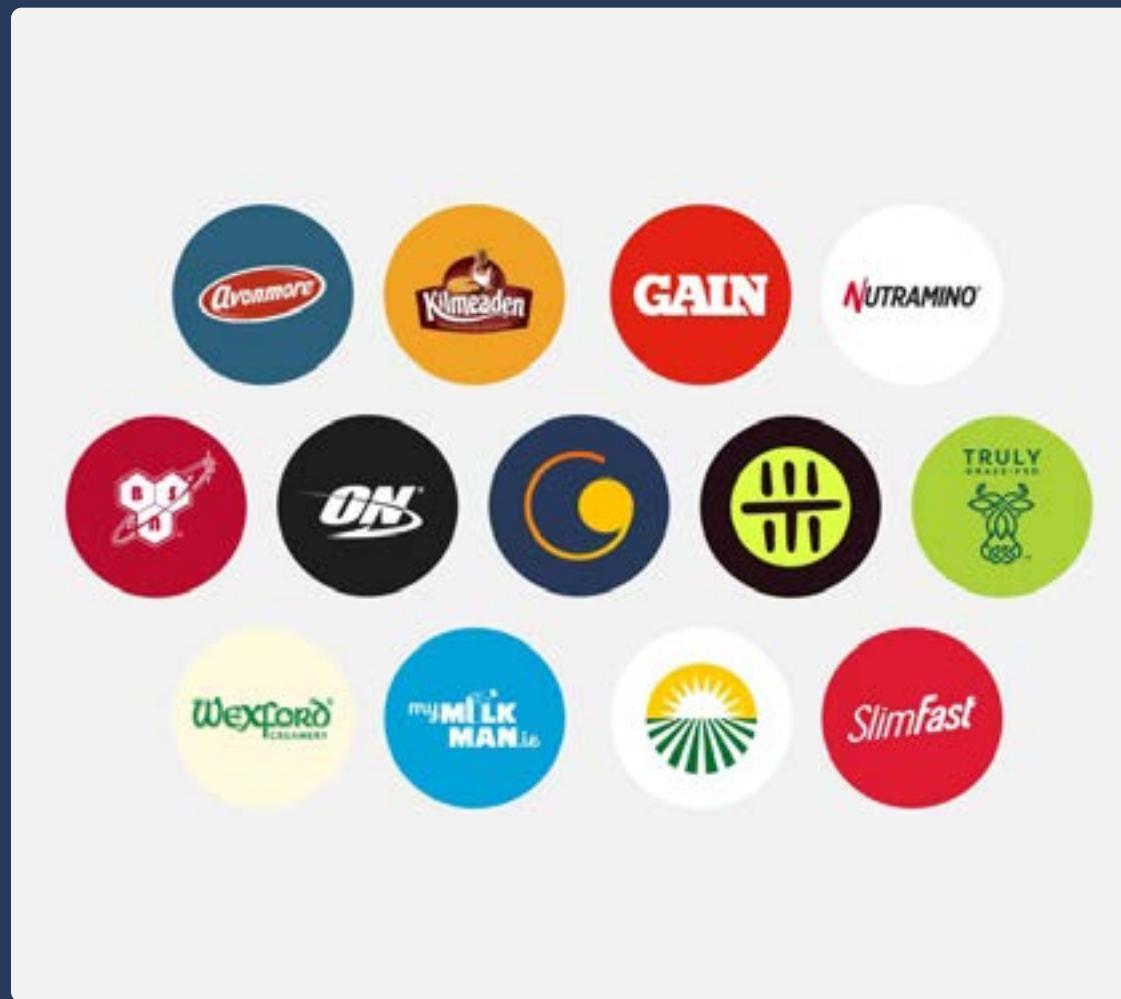

- Text styles: Ag CH H1 Global - 68.8/82.6, Ag CH H2 Global - 39.8/47.8, Ag CH H3 Global - 27.6/33.2, Ag CH H4 Global - 23/33.2, Ag CH P Global - 16/23
- Color styles: Icy Blue, Base Yellow, Pistachio, Shy Rose, GP Blue, Smoke Ash, Gradient Icy Blue, Gradient Base Yellow, Gradient Pistachio, Gradient Shy Rose, GP Copy, GP Black, GP Subtle Gray

## One For the Future.

This project does not end with me, however.

I've created various text styles, colour styles and components for repeating assets, ensuring a smooth handover to future collaborators of the project.

These are all customisable, and a supporting document is also provided for reference.

# Working with the award-winning internal agency at Glanbia.

## ROLE

Creative Associate & Developer

## CREATIVE TOOLKIT

Adobe Creative Suite, Figma, HTML & CSS, Mural, Spark AR, Ceros, Google Web Designer

## DISCIPLINE

Branding & Identity, Digital Design, Print Design, Campaign Development, Corporate Branding, Social Media Marketing, Motion Design, Email Marketing, Digital Display Advertising, UI Design, Front-End Development, & Extended Reality (XR)

Glanbia is a global nutrition company with a mission to help people lead healthy, active lives. With its products sold in over 130 countries worldwide, Glanbia is home to industry-leading brands and possesses a leading market position in sports nutrition, dairy and non-dairy ingredients, vitamins, and mineral premixes.

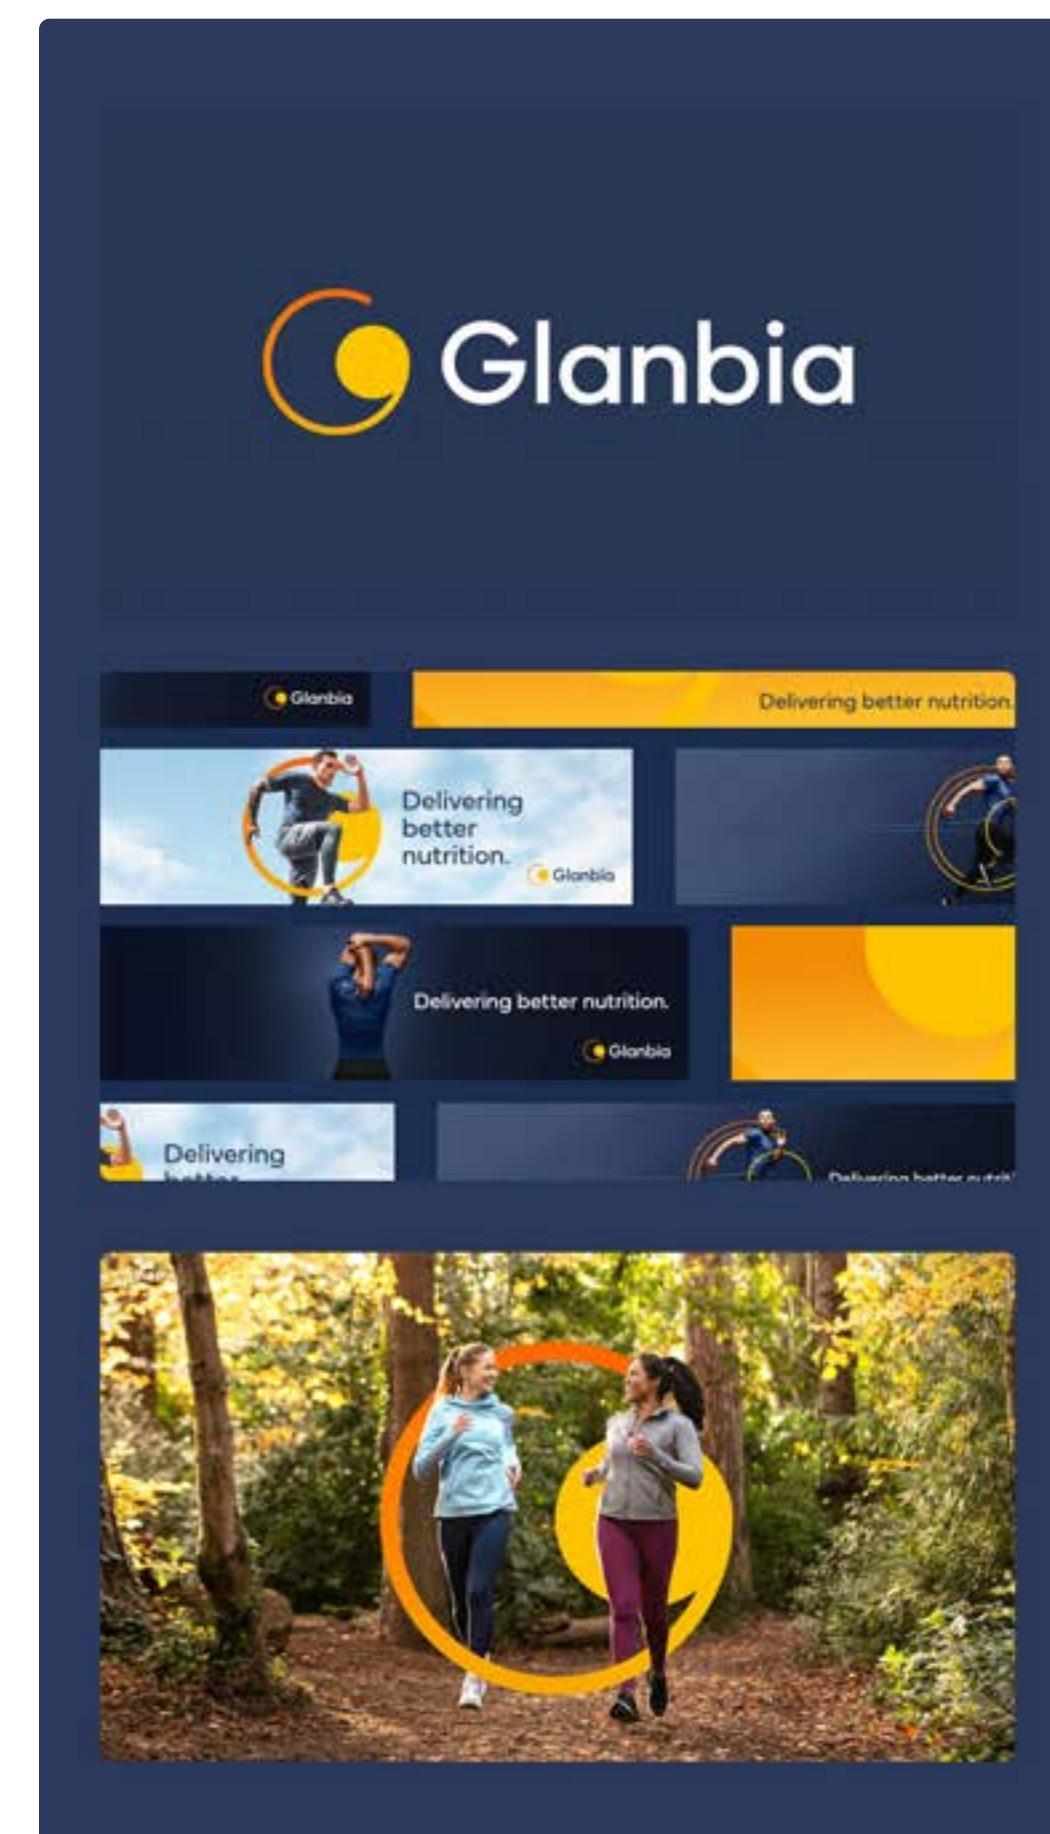

I work with the Digital+ team, the award-winning internal agency at Glanbia consisting of digital strategists and marketers, social media experts, creatives, videographers, UX experts, and web developers, all working on projects within the Glanbia brand portfolio.

As a Creative Associate & Developer, I worked on ideating and developing creatives and executing marketing campaigns for both B2B and B2C channels in various platforms while introducing new technologies and bringing key design collaterals development in-house.

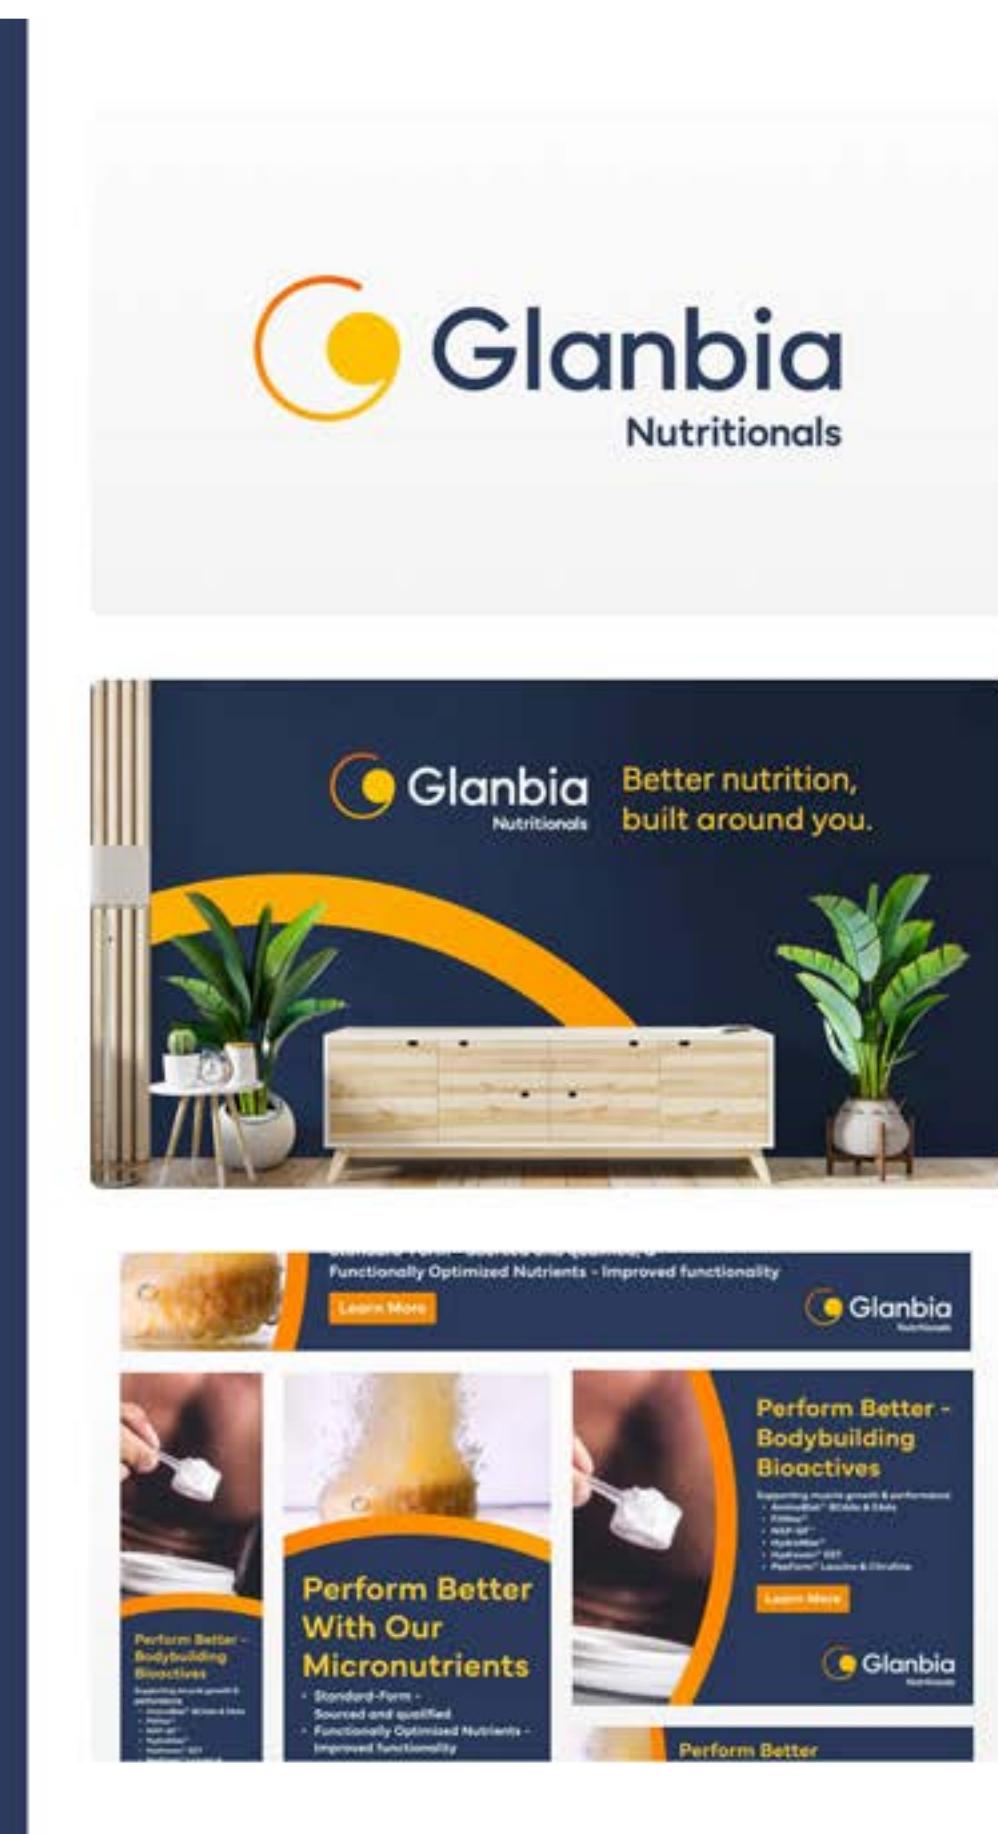

**Working with Globally Recognised Brands**

I've enjoyed working with all the brands within the Glanbia portfolio for both B2B and B2C channels.

Whether it's digital, motion or print. Social, display, or email. All mediums. All platforms. From awareness, to conversion.

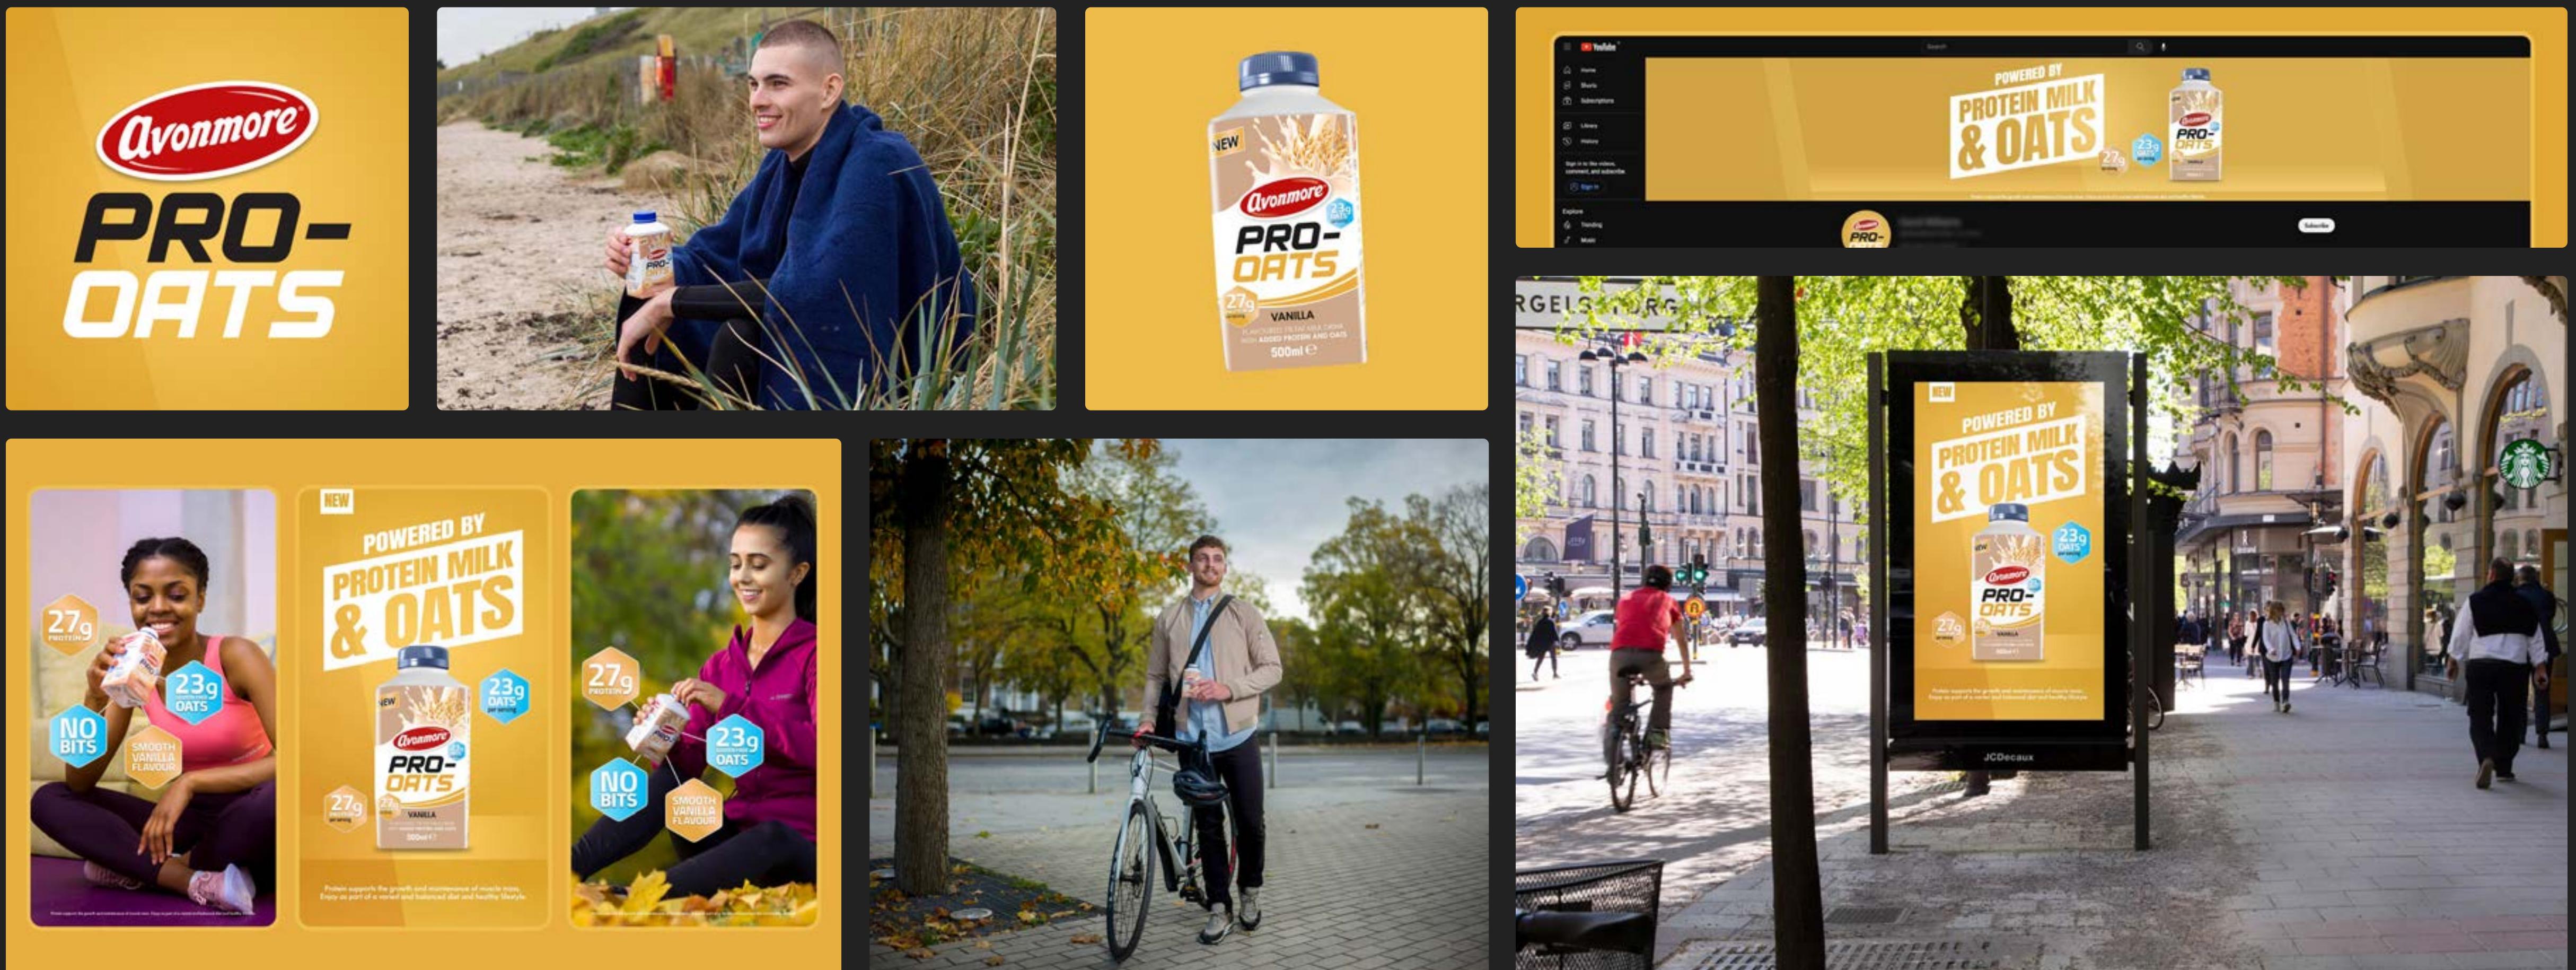

## A New Look Towards the Future

I've supported the rebranding of Glanbia, Glanbia Nutritionals, and Tirlán, dealing with various creative assets and collaterals, working in tandem with key stakeholders in-house and externally from development to launch.

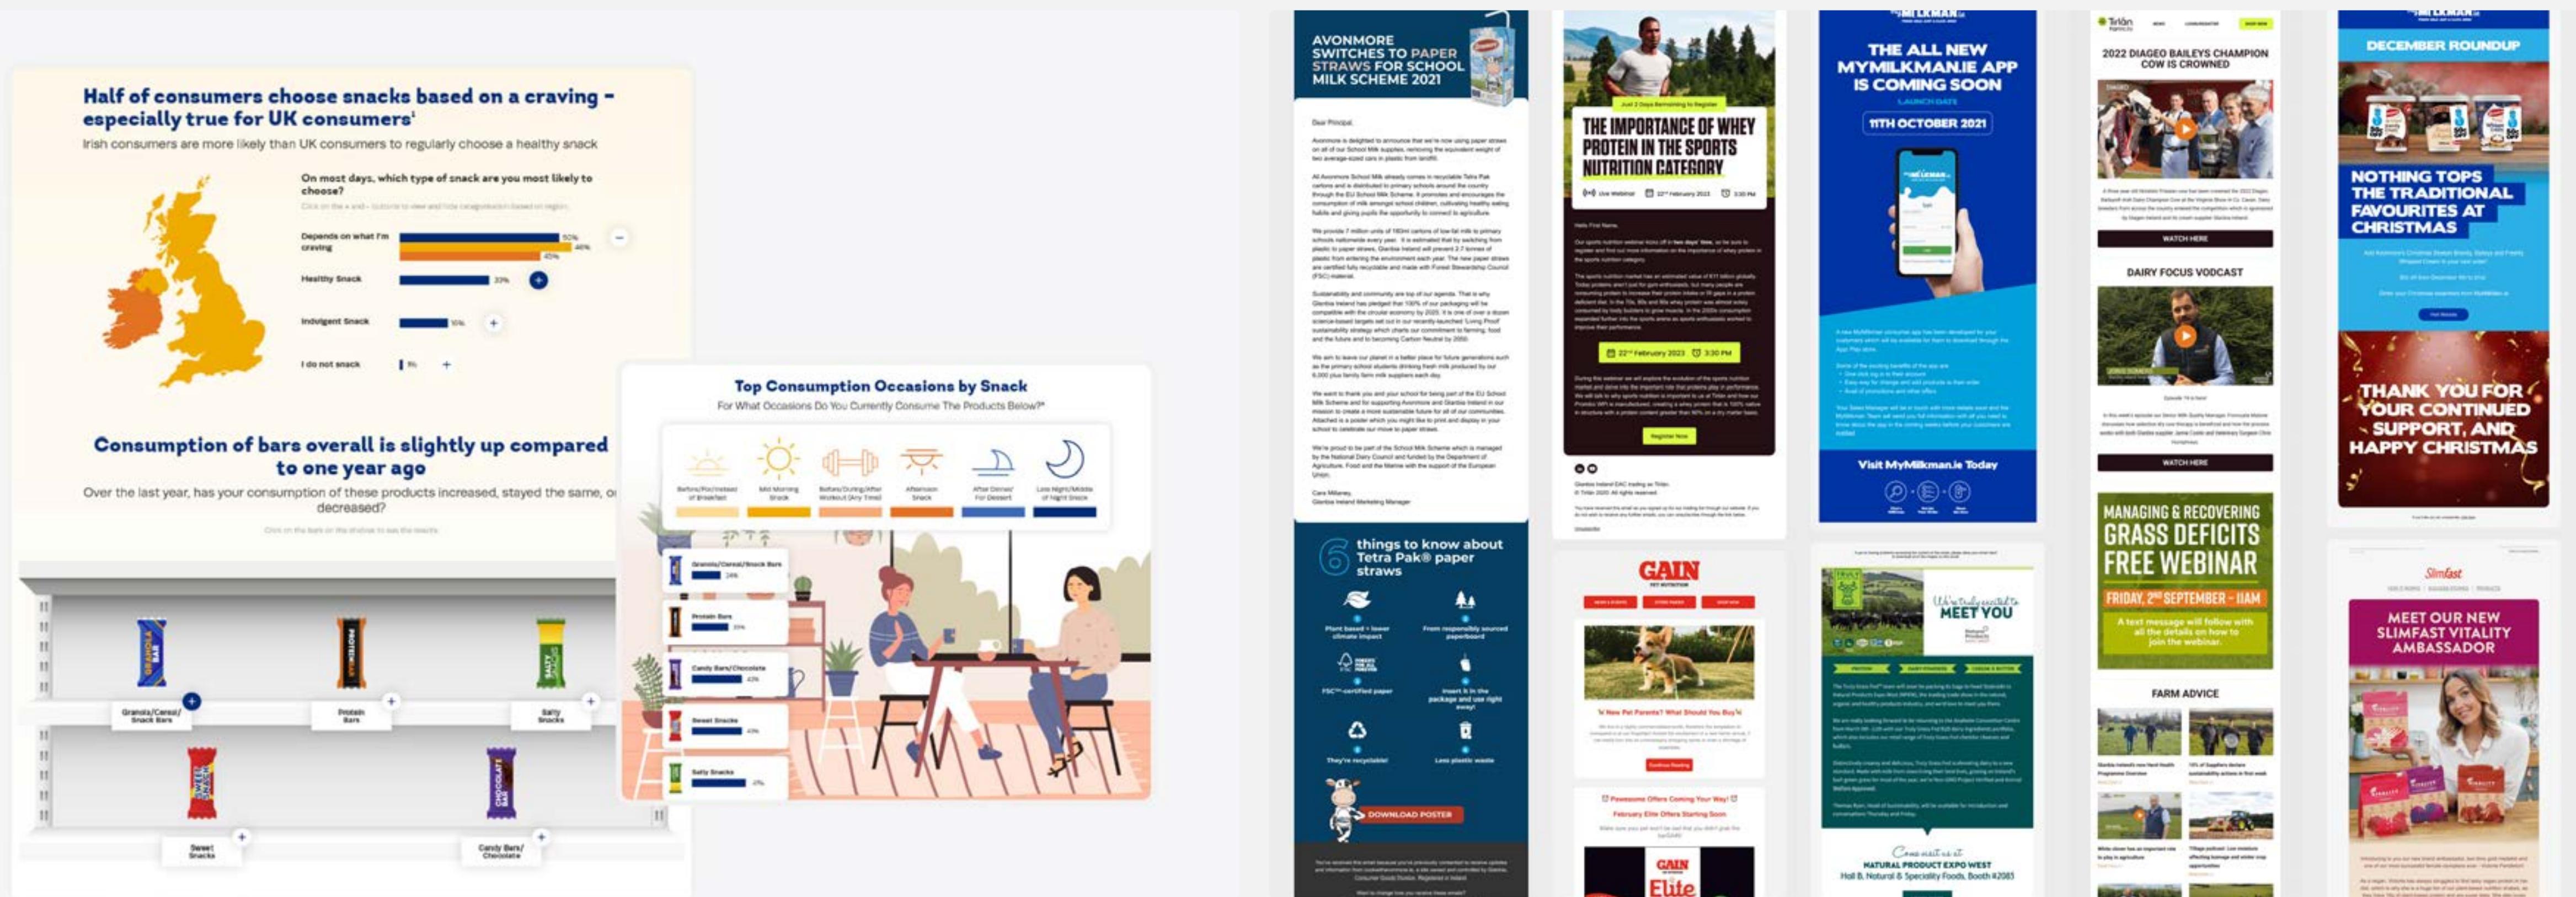

## Bringing Ideas and Pitches to Life

Involved throughout the campaign life-cycle from initial brainstorming to launch. Worked on the overall styling and composition, and developed static and motion assets for social and DOOH.

• AVONMORE PRO-OATS [2021 - 2022]

## A New Look Towards the Future

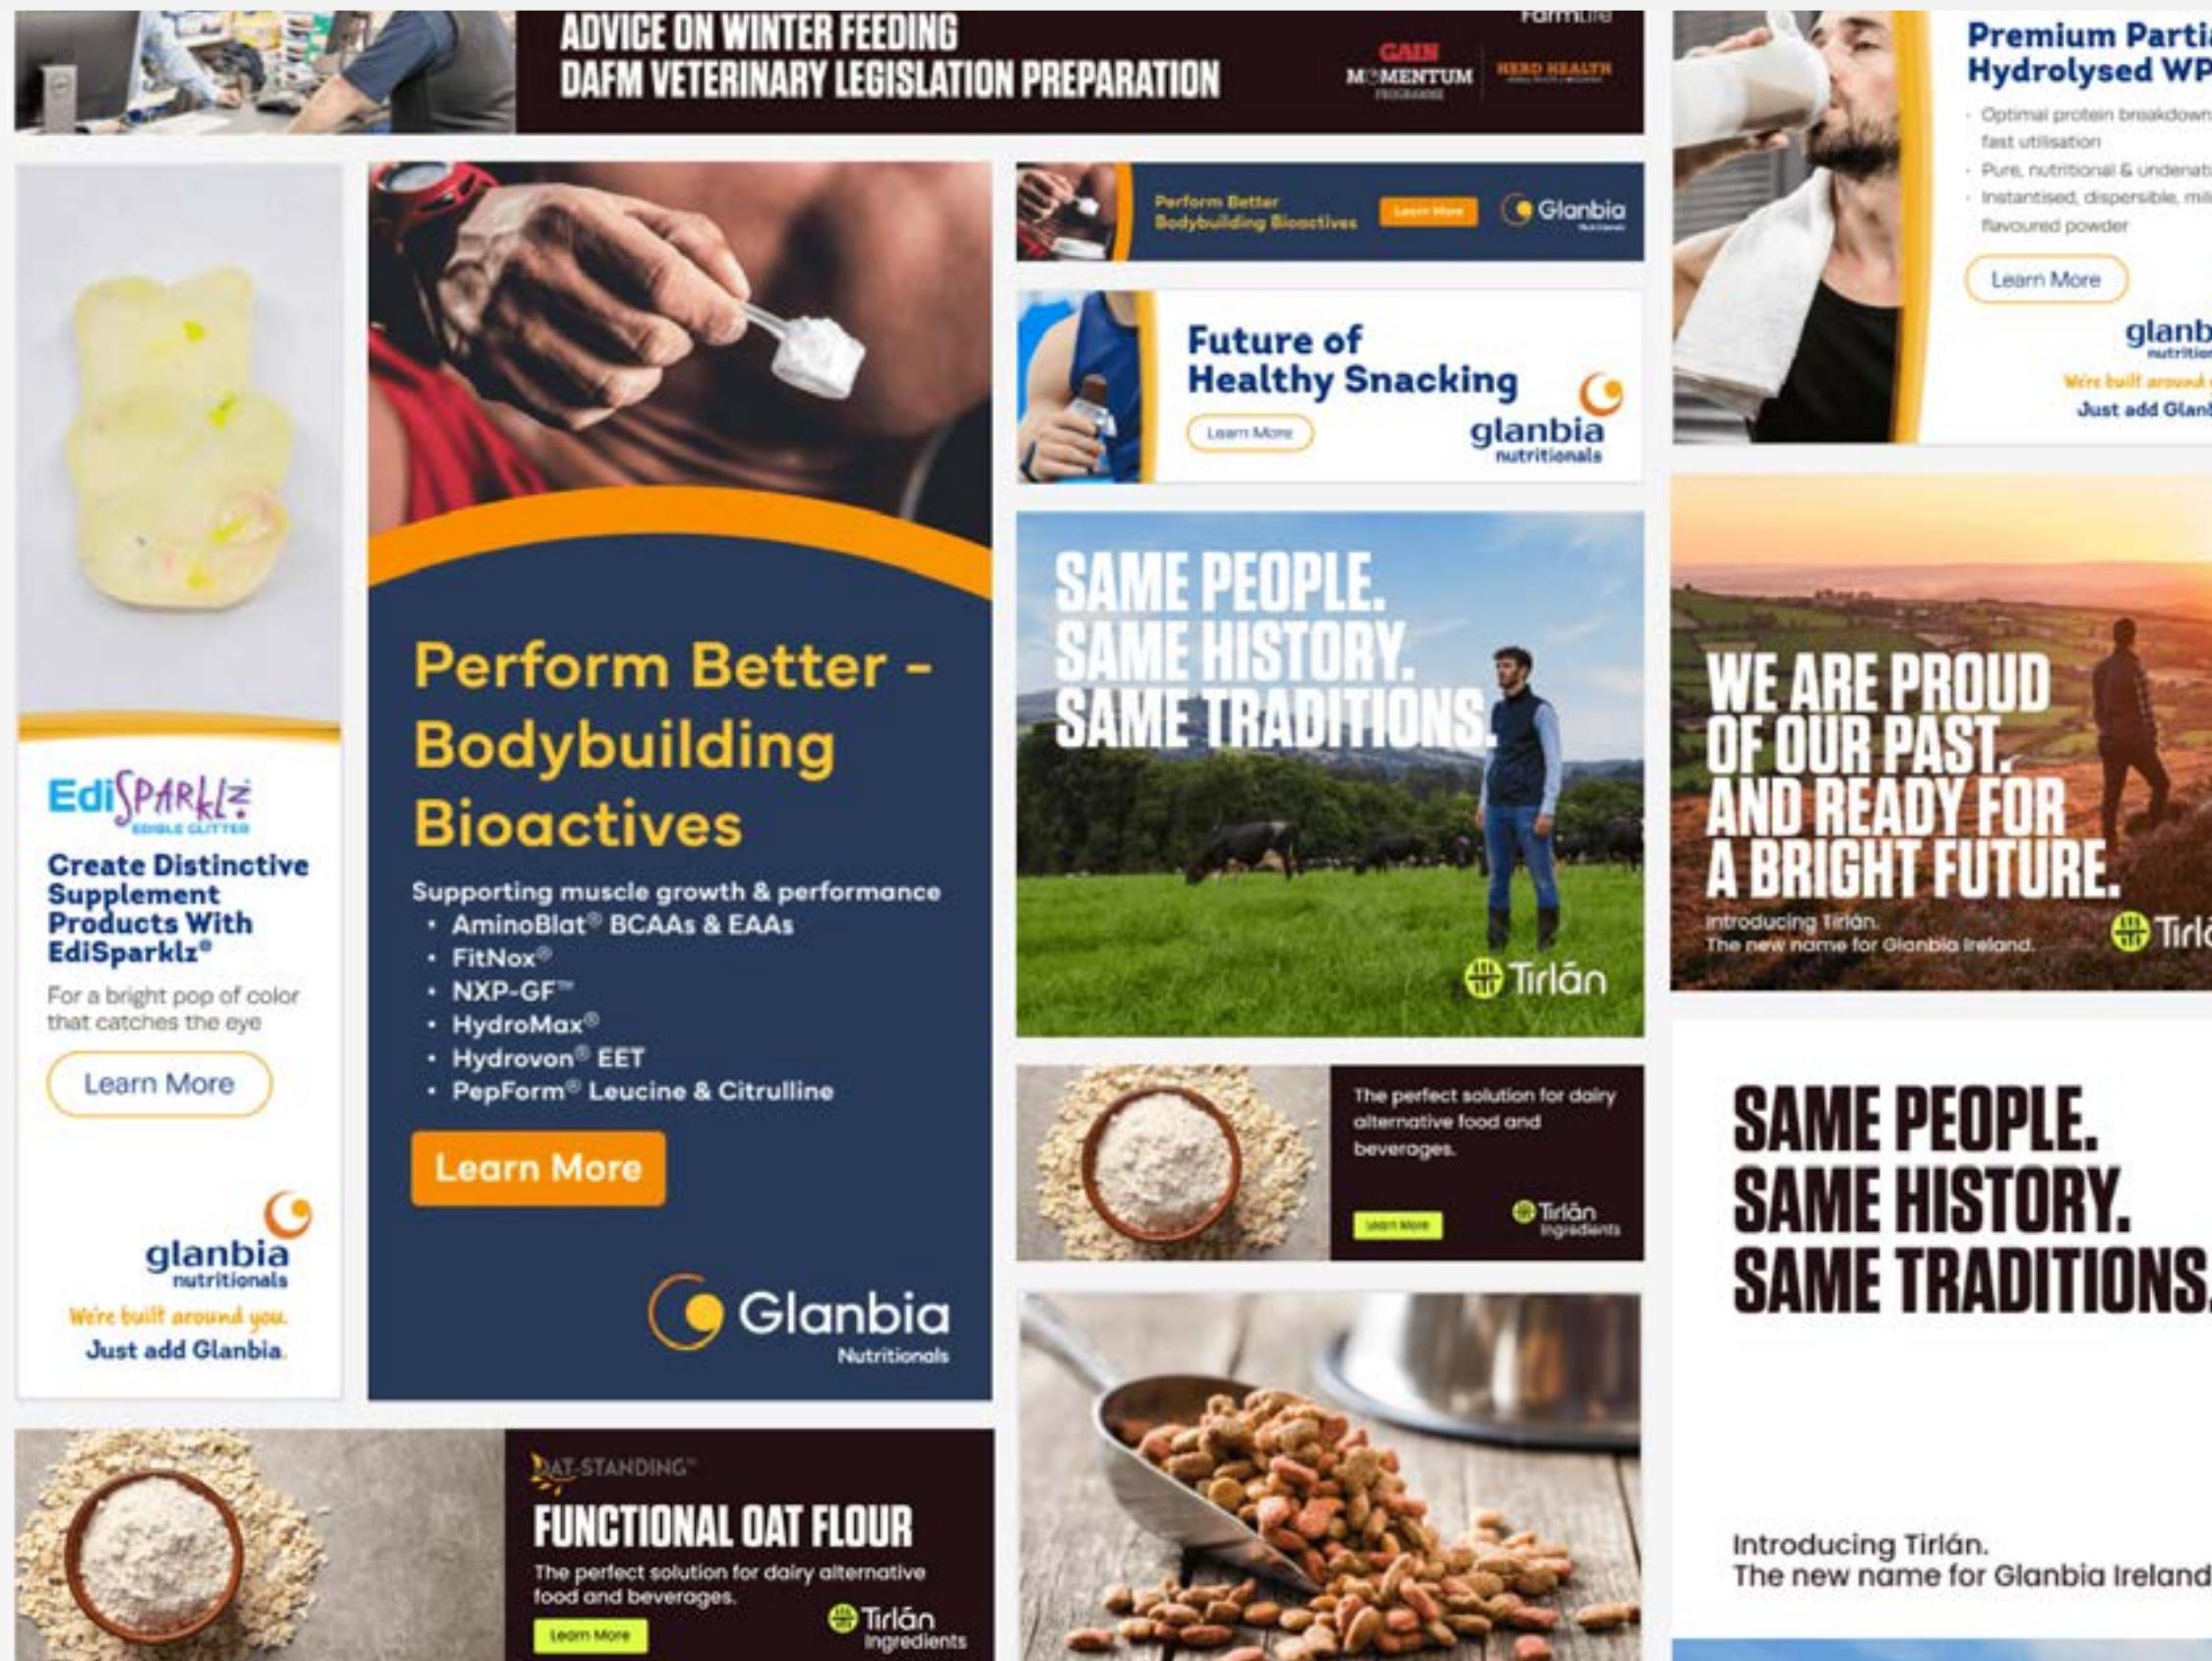

Sometimes, a little bit of interactivity is just what we needed.

I've designed and built static microsites and interactive web experiences using vanilla HTML & CSS and Ceros.

## You've got Mail

From <div></div> to <table></table>. From <display:grid> to <td width=50%>

I've designed and deployed responsive email marketing campaigns and templates with beautiful and formatted code using multiple marketing platforms tailored to the brand's needs.

## A New Look Towards the Future

I've designed and developed digital display advertising banners through Google Web Designer (GWD) and successfully brought the production of digital display advertising in-house.

## New Technologies, New Capabilities

With the rapid pace of standardisation in XR technologies, we've introduced AR capabilities through social for Kilmeaden and GAIN, opening a world of possibilities to the business.

# BLNK

Project Supervisor[Dearbhla Brodigan ↗](#)  
Project Manager & Videographer[Faye Flynn ↗](#)  
Digital Marketer & Researcher[Mary McKeever ↗](#)  
Designer & Researcher

BLNKDISRUPTION is a research-led project investigating the evolution of creative media, what it is today, and what it could develop into in the future. The project also examines the potential reaction of the community to the progression of creative media from traditional to contemporary through augmented reality (AR).

BLNKDISRUPTION was exhibited and awarded the best project in show at the annual FÍS Graduate Exhibition at DkIT in 2019.

## The Tea

Inspired by adult colouring books, we've invited students and staff from Dundalk Institute of Technology (DkIT) to an interactive workshop where they partake in a collaborative artwork that would later be showcased through an experience powered by Snapchat Lens accompanied by a soundscape.

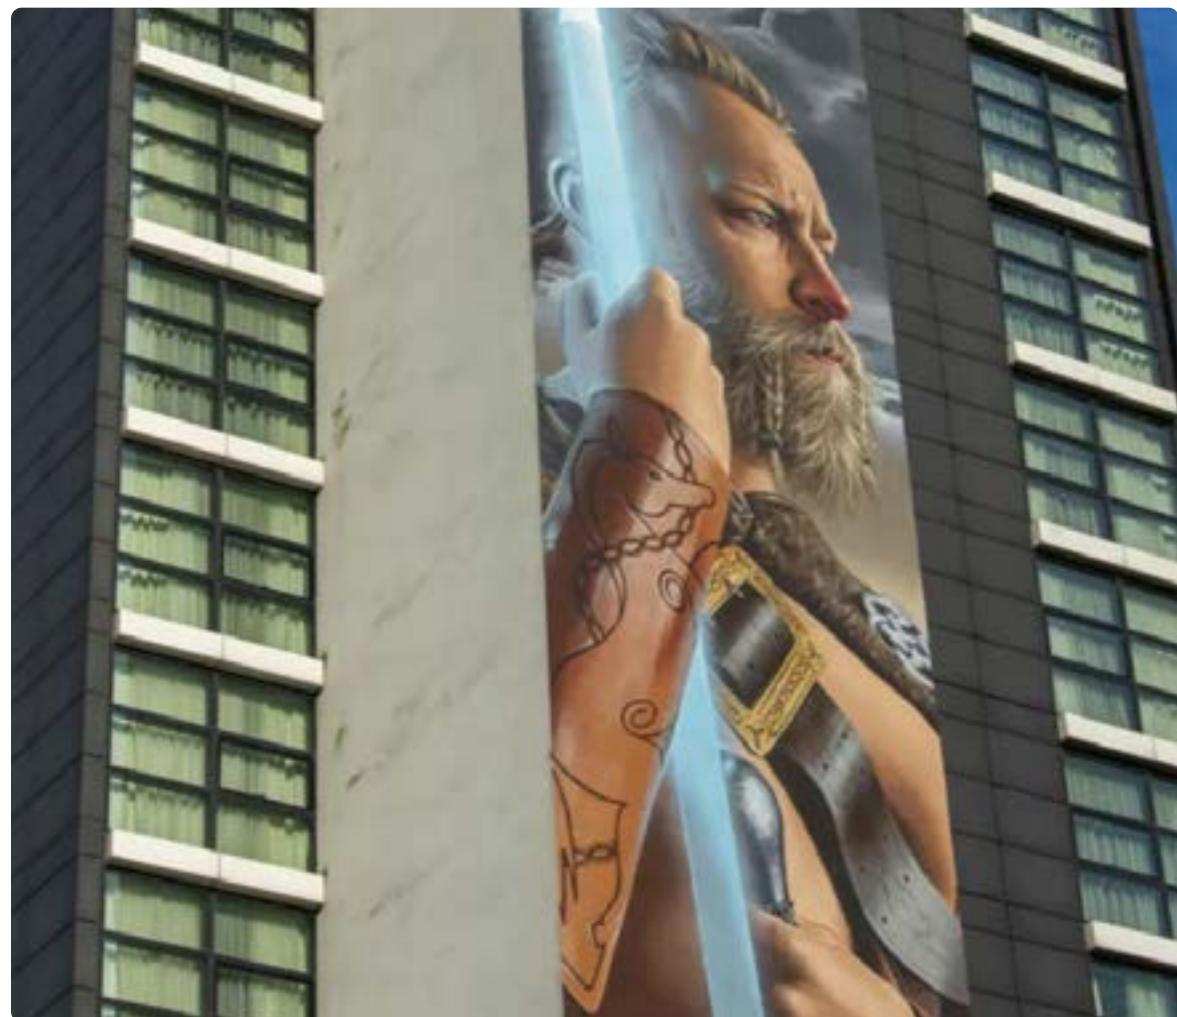

The team in BLNKDISRUPTION consists of 4 creative media graduates from DkIT tackling different disciplines and responsibilities throughout the project. I was delegated as one of the designers of the team, building design documents, collaterals, and the overall branding & identity with a combination of a developer role where I explored and applied the various extended reality (XR) technologies used in the project, and designing and building a microsite for the project.

BLNKDISRUPTION was exhibited and awarded the best project in show at the annual FÍS Graduate Exhibition at DkIT in 2019.

The project and the exhibition were also featured in the June issue of the Dundalk Democrat.

• THE DREAM TEAM - LEFT TO RIGHT - DEARBHЛА BRODIGAN, RENNO RIYADI, FAYE FLYNN, MARY MCKEEVER

## Developing Our Research Question

The project was initially formed through our mutual fascination with street art. Ireland is no stranger to street art and its effect on the gentrification of its cities - Dundalk itself has seen a resurgence in street art thanks to [SEEK](#) in 2019.

The way we perceive street art has changed in general society. Art has become more prevalent in public spaces than ever before, with communities incorporating them being normalised and seen as a way of expressing ourselves.

As the project evolved throughout the year, so has the research question. The word 'uplifting' comes up a lot in our discussions. We've hypothesised that people will have an additional affinity towards the artwork if they are directly involved in its development.

The evolution of technology is not something to be ignored, with the standardisation of XR and its lower barrier of entry. We've decided to explore this route further by investigating the evolution of different art mediums and their impact on the community.

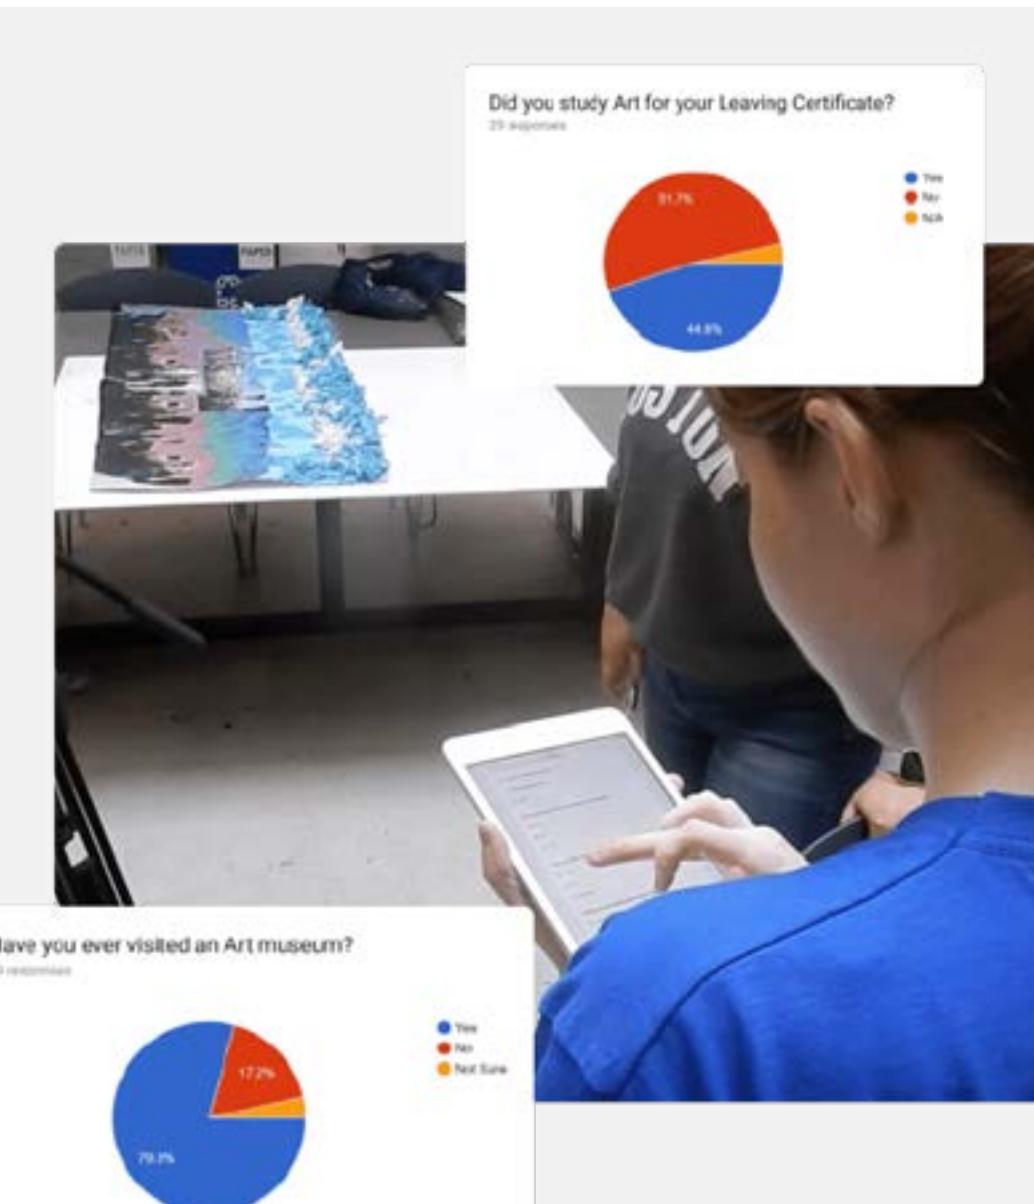

Exploring Audience Reactions to the Progression  
from Traditional to Contemporary Creative Media

## Research

Creative media falls under several headings, including but not limited to advertising, film, publishing, TV, radio, and interactive media. A common denominator towards all of the above is its evolution and how it's driven by technology.

A key element to our project is the community and the impact of the technology on it. We invited students and staff throughout the institute to partake in an interactive workshop in which they are encouraged to paint and draw in an artwork our team has developed prior, which would then be brought up to life through AR.

Traditional to *contemporary*.

### Online Surveys

An initial survey is distributed campus-wide to gather quantitative data about their familiarity with the research question and interest in participating in the workshops.

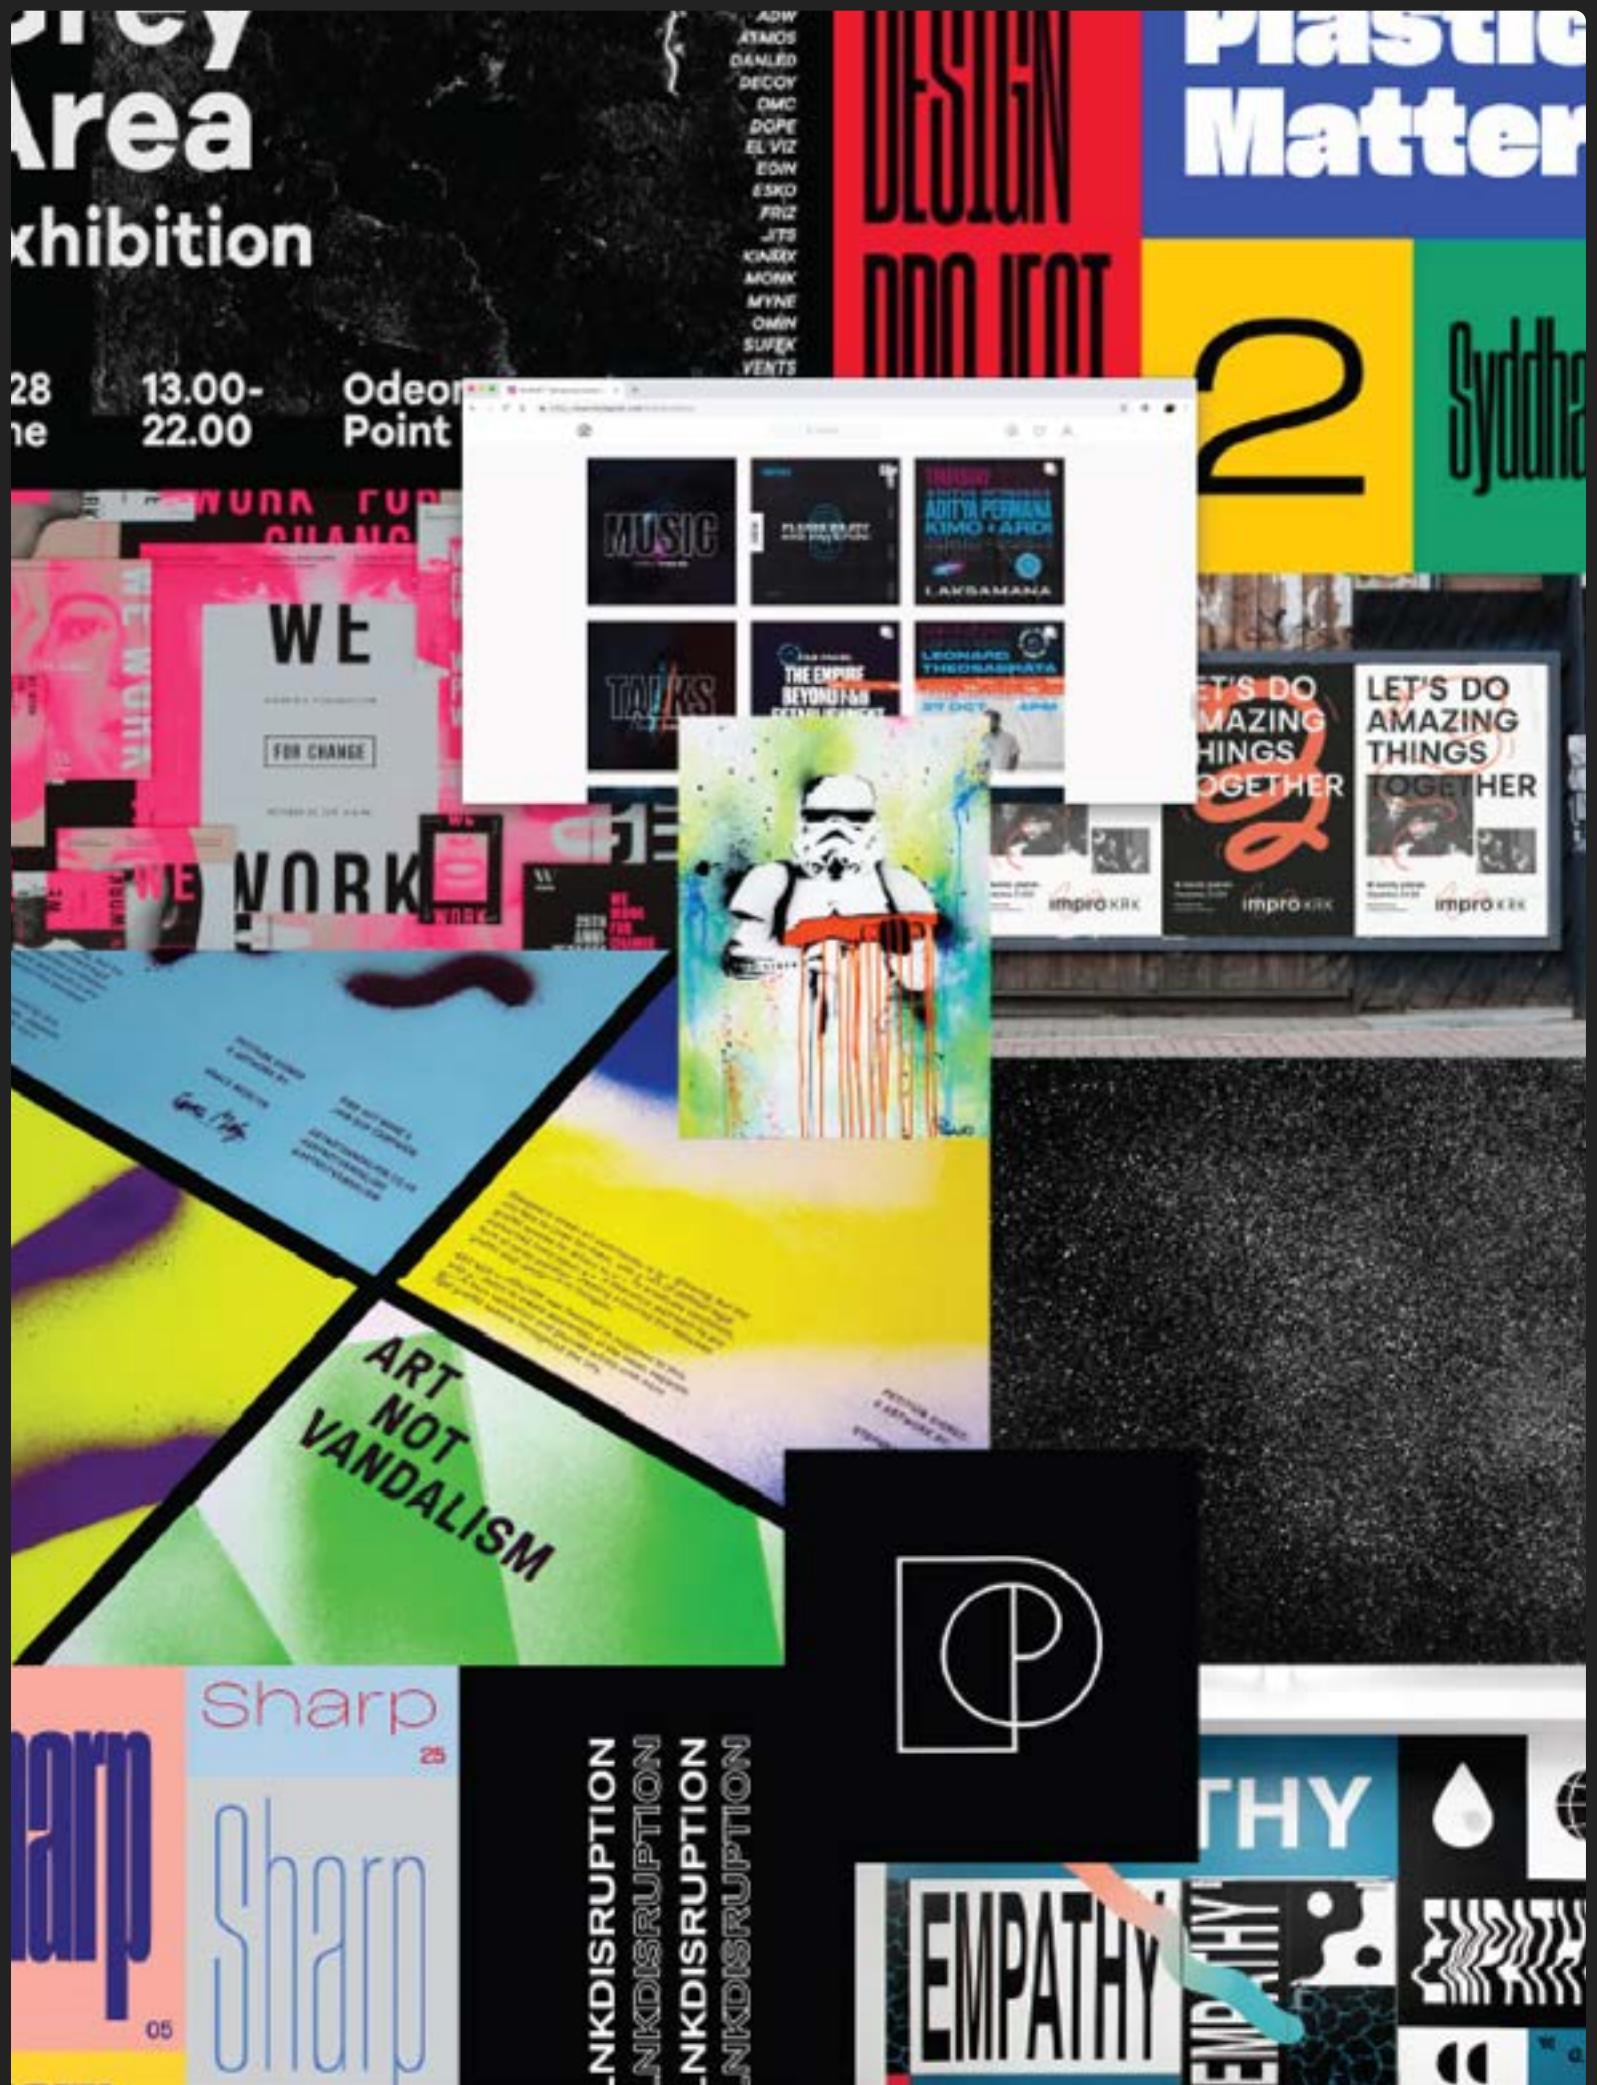

### Focus Groups

A group of participants is invited to partake in a focus group session post-workshop discussing the session and overall satisfaction.

### User Interviews

Participants are also invited to be interviewed to gather qualitative data with the potential of developing the research question further and gathering deeper insights and opinions.

## Type to Go

Typography is a huge to our brand as it serves as another medium to showcase art. The term typography itself is the creation of art using letterforms.

We've used an altered version Anderson Grotesk four our identity, and adopted a selection of colours audited through a semiotic analysis.

**BLNK**  
To Demonstrate the Evolution of 'Creative Media' Mediums  
And Its Ability to Uplift and Inspire a Community

Dundalk Institute of Technology - VPP Presentation March 2019

## Meet the Team

Dearbhla Brodigan - Project Manager and Videographer  
Faye Flynn - Sound Designer and Researcher  
Mary McKeever - Graphic Designer and Researcher  
Renno Riyadi - Web Developer and Graphic Designer

Dundalk Institute of Technology - VPP Presentation March 2019

## Research Question

"Can the Evolution of Creative Media Mediums Inspire and Uplift a Community?"

We wanted to explore the ideology that community based art can inspire and uplift people whether it be a traditional or a modern piece of art.

We plan to test our research question by creating a creative collaborative workshop with a community using traditional and contemporary art that will hopefully evoke feelings of inspiration.

Dundalk Institute of Technology - VPP Presentation March 2019

## Research Question

Conduct primary research  
Create a creative collaborative art piece with a community of people  
Conduct our methodology strategies with our participants  
Create a social media campaign  
Create a mini documentary of our journey throughout the project  
Create a website  
Turn our traditional art piece into an augmented reality artwork  
Display our final artwork at Fis

Dundalk Institute of Technology - VPP Presentation March 2019

## Project Research

- Community Based Art
- Adult Colouring Books
- Powerful and Inspirational Art
- Evolution of Creative Media Mediums
- Augmented Reality

Dundalk Institute of Technology - VPP Presentation March 2019

## Research Methodology

We are using quantitative and qualitative research methods for our project.

We will be conducting surveys with the participants of the creative collaborative workshop after they complete their part and also after they see the finished art piece.

We will also be conducting brief interviews with a few selected participants to get more detailed responses to enable us to test our hypothesis.

Dundalk Institute of Technology - VPP Presentation March 2019

## Project Overview

Creative Collaborative Project with a community, incorporating both traditional and contemporary artistic elements.

Our aim is to create a powerful and uplifting art piece in both traditional and non traditional mediums with the contributions of a community of people.

Our traditional piece will be using paint and our contemporary piece will be Augmented Reality

Dundalk Institute of Technology - VPP Presentation March 2019

## Project Overview

After investigating and developing our research we planned to have a creative collaborative workshop with a group of students on the 21st of March 2019.

We planned our workshop by starting a social media campaign, finalising our design, painting our boards, projecting our design to sketch and booking out filming equipment.

Dundalk Institute of Technology - VPP Presentation March 2019

Experiencing Artistic Resonance in Interpreting Traditional vs Contemporary Creative Media

Watch the Documentary

**Our Project**

BLNKDISRUPTION is a project which aims to investigate the evolution of creative media, what it is in its traditional form and what it can develop into with the assistance of modern technologies.

The core of the project is to explore the progression of creative media from traditional to contemporary. The project often examines the potential reaction they could have on an audience.

BLNKDISRUPTION encourages everyone to experience the project through the lens of traditional and contemporary creative media. Share your own unique Lens Code to unlock our unique Lens! Here you're ready to bring me elephant to life!

Our ambition was to produce a successful and insightful object that will create an engaging user experience through the use of a Snapchat Lens. This has enabled a place of interaction for people to come together and share their own personal interpretation of traditional to contemporary creative media and highlights the potential of technology on traditional media.

Curious on the Elephant? Try out the AR experience from the comfort of your home by scanning the image with your smartphone!

**Project Findings**

As part of our research question, we wanted to analyse people's reactions to using traditional vs using contemporary creative media. In order to obtain these results, we used both quantitative and qualitative research methods.

Documentary documenting our process and our findings throughout the duration of the project.

This video includes a mix montage of the work the researchers did in order to prepare for the traditional painting day. This included painting the boards while projecting the design onto the boards, defining the design and testing it with Beach Market.

The montage video also shows a snippet of the traditional painting day and the uniqueness of each individual's interpretation of the design. It also shows a documentary of the team's reactions why selected on the first day they invested contemporary piece. The researchers had a lot of fun making the project and the montage hopefully reflects this!

## Home for Ellie 🐘

BLNKDISRUPTION's website acts as a central hub of information for the project, consisting of project context, research results, and any further collaterals that were predetermined in the project deliverables. Built with HTML & CSS, deployed via Github.

## Setting the Scene Right

Can't make it to the exhibition? Download the Snapchat app and scan the QR code to try out the AR experience yourself from the comfort of your home, featuring a bespoke soundscape putting Ellie near you.

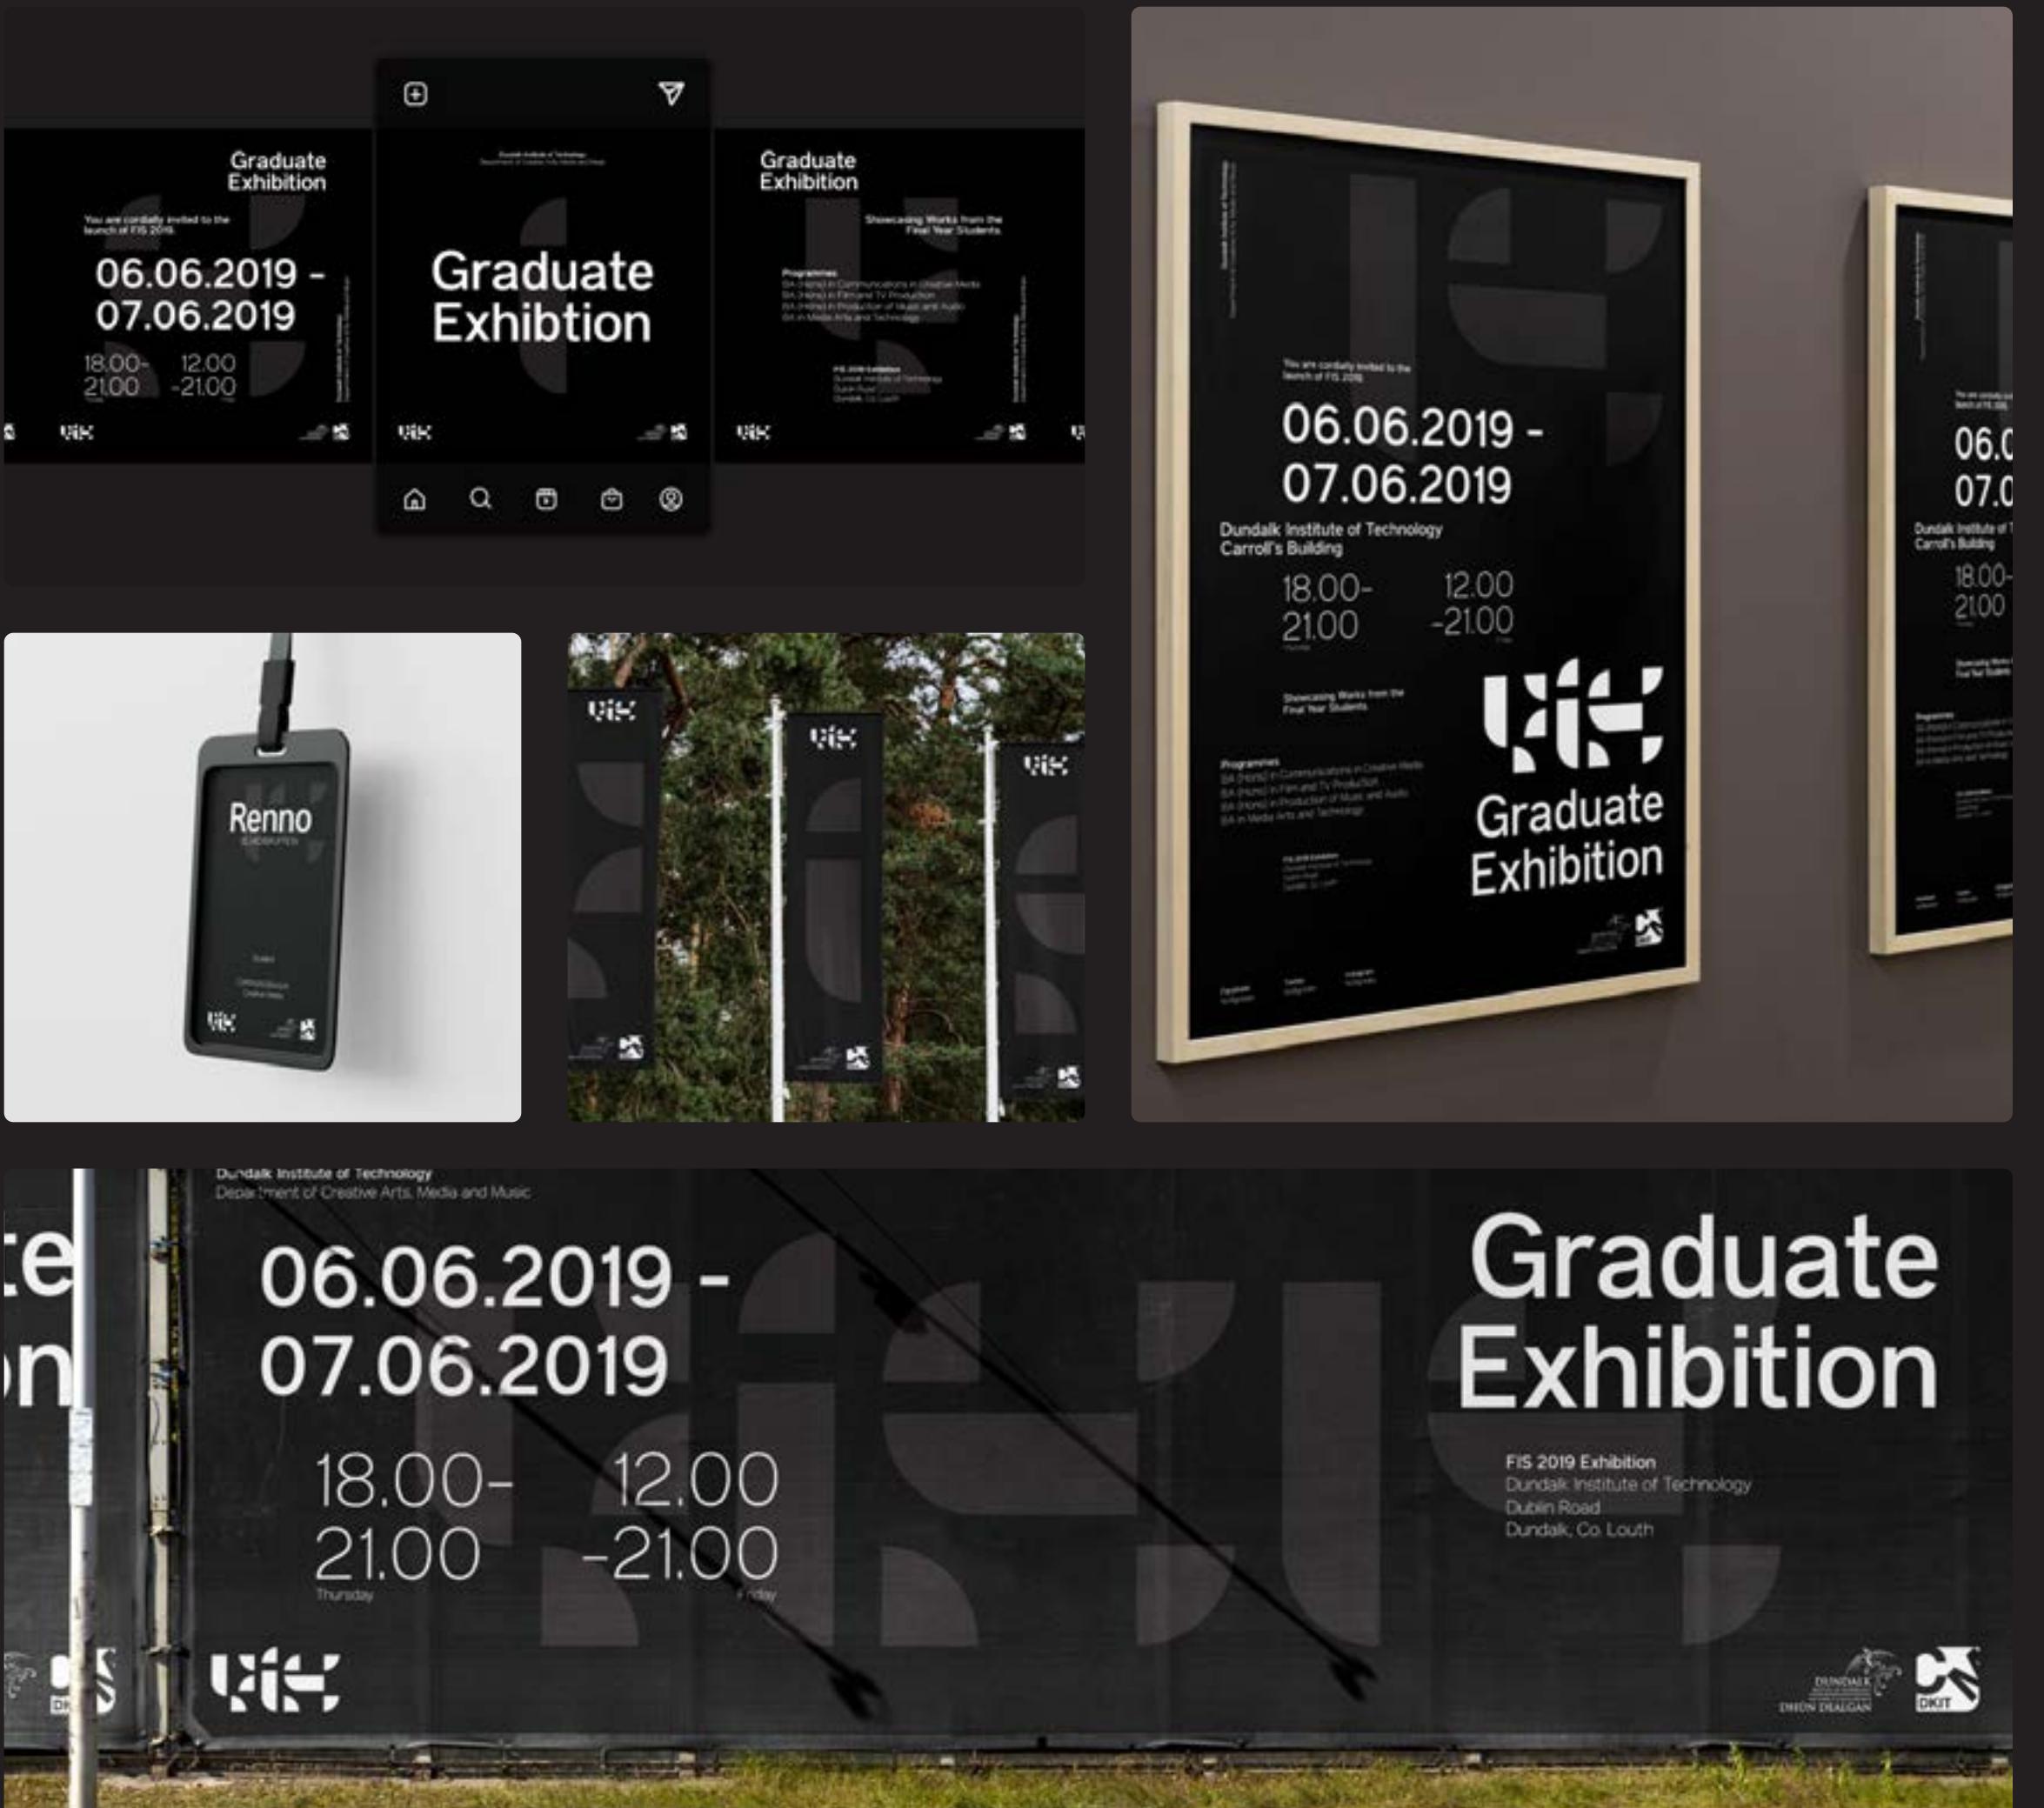

# An Identity representing the future within the creative hub of Dundalk Institute of Technology.

ROLE	PROJECT TIMELINE	PROJECT TOOLKIT	PROJECT CONTRIBUTION
Sole Designer	12 Weeks	Adobe Creative Suite	Branding & Identity, Social Media Marketing & Print Design

Derived from the word 'vision' in Irish.

FÍS (/fíːʃ/) is the annual graduate exhibition hosted by Dundalk Institute of Technology (DkIT) showcasing the work of students from BA (Hons) Communications in Creative Media, BA (Hons) Film and Television and Production, BA (Hons) Production of Music and Audio, and BA Media Arts and Technologies.

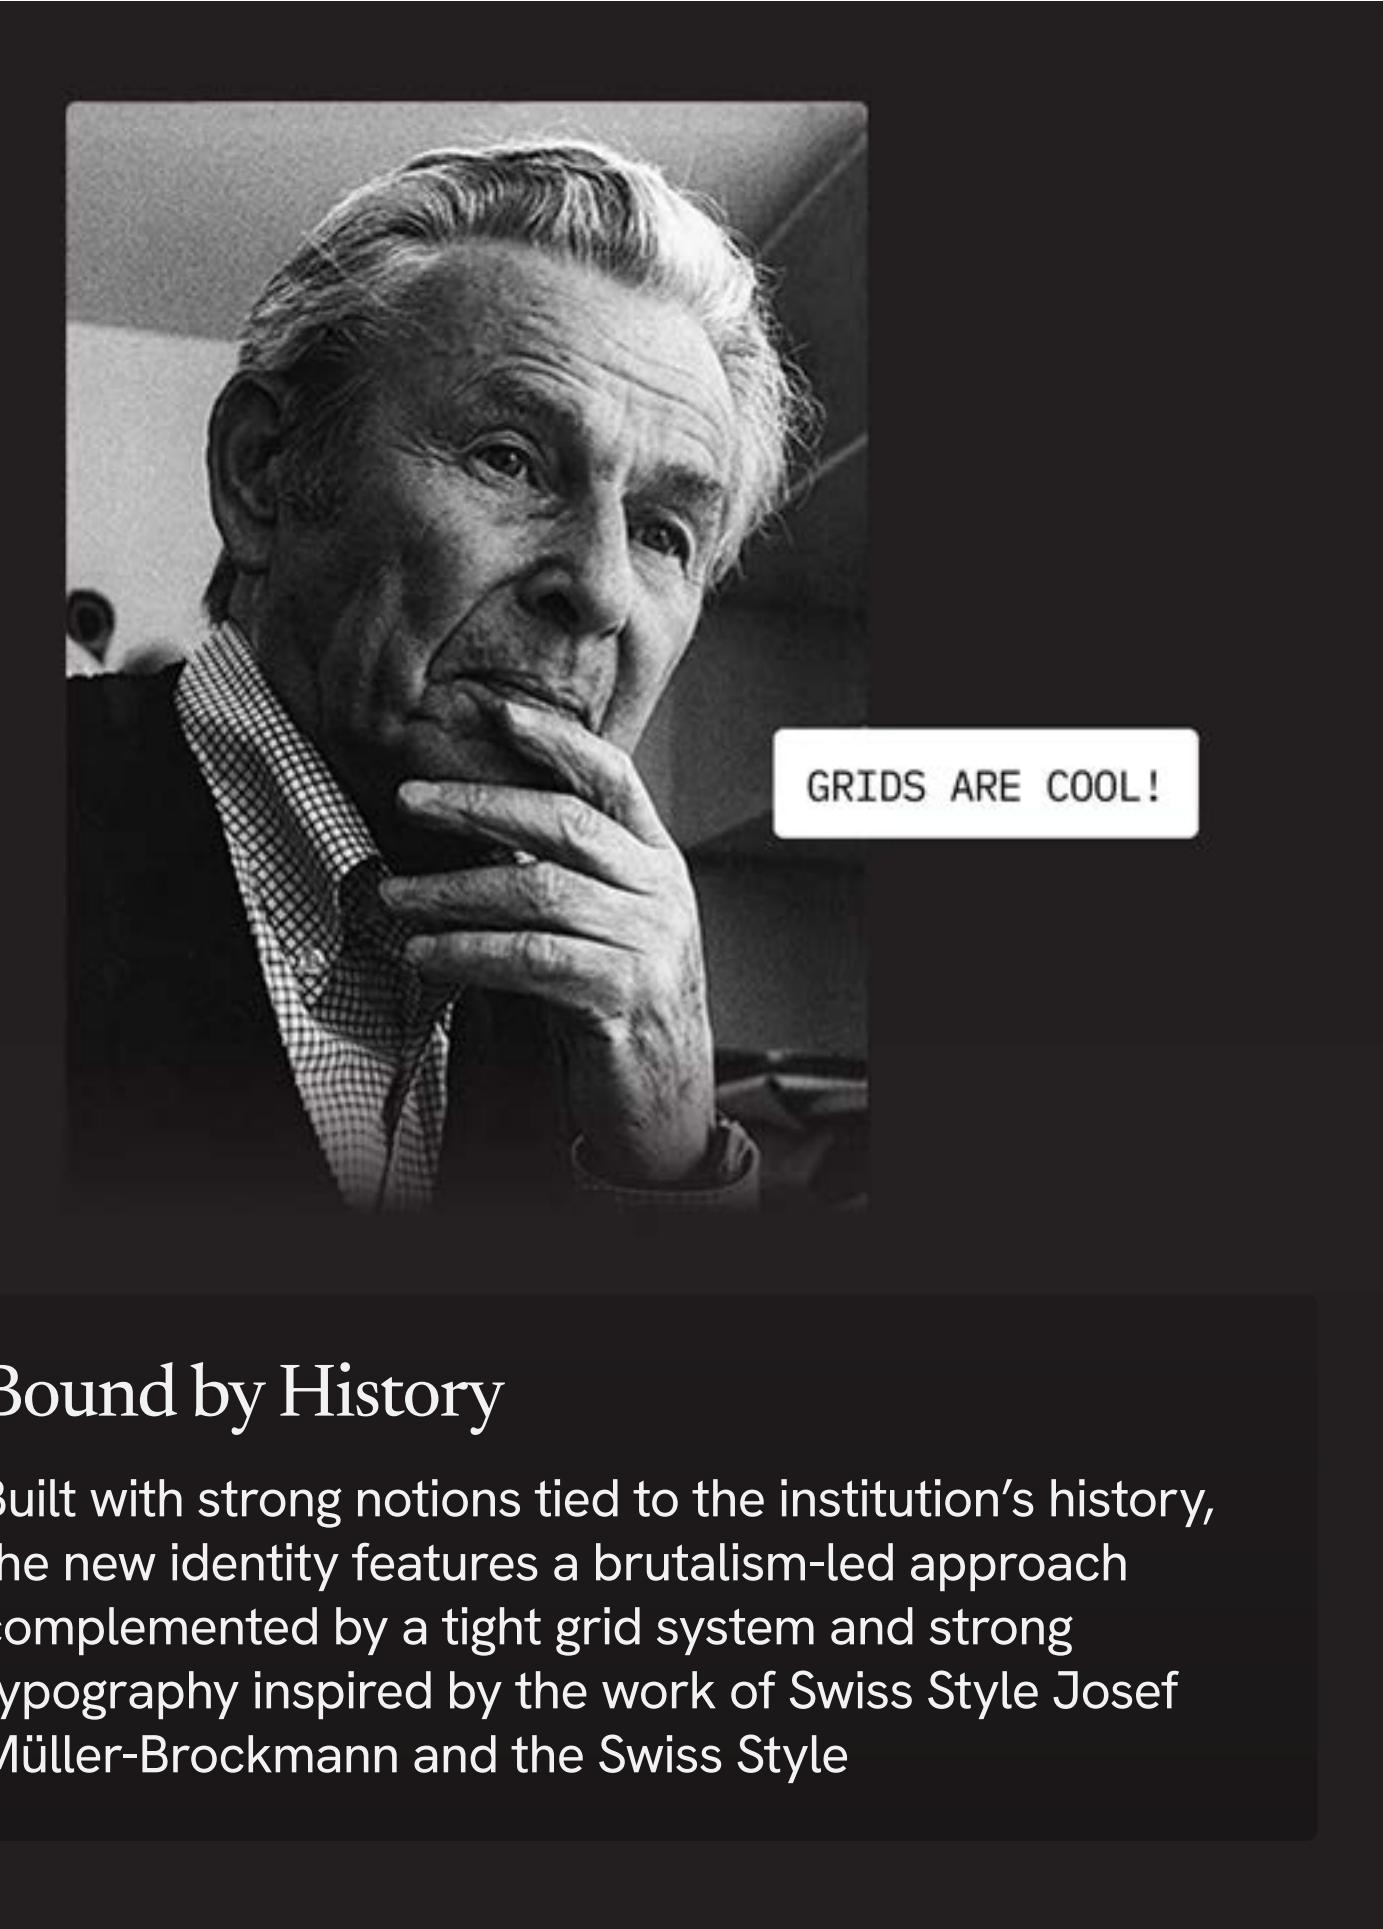

# Design Rationale

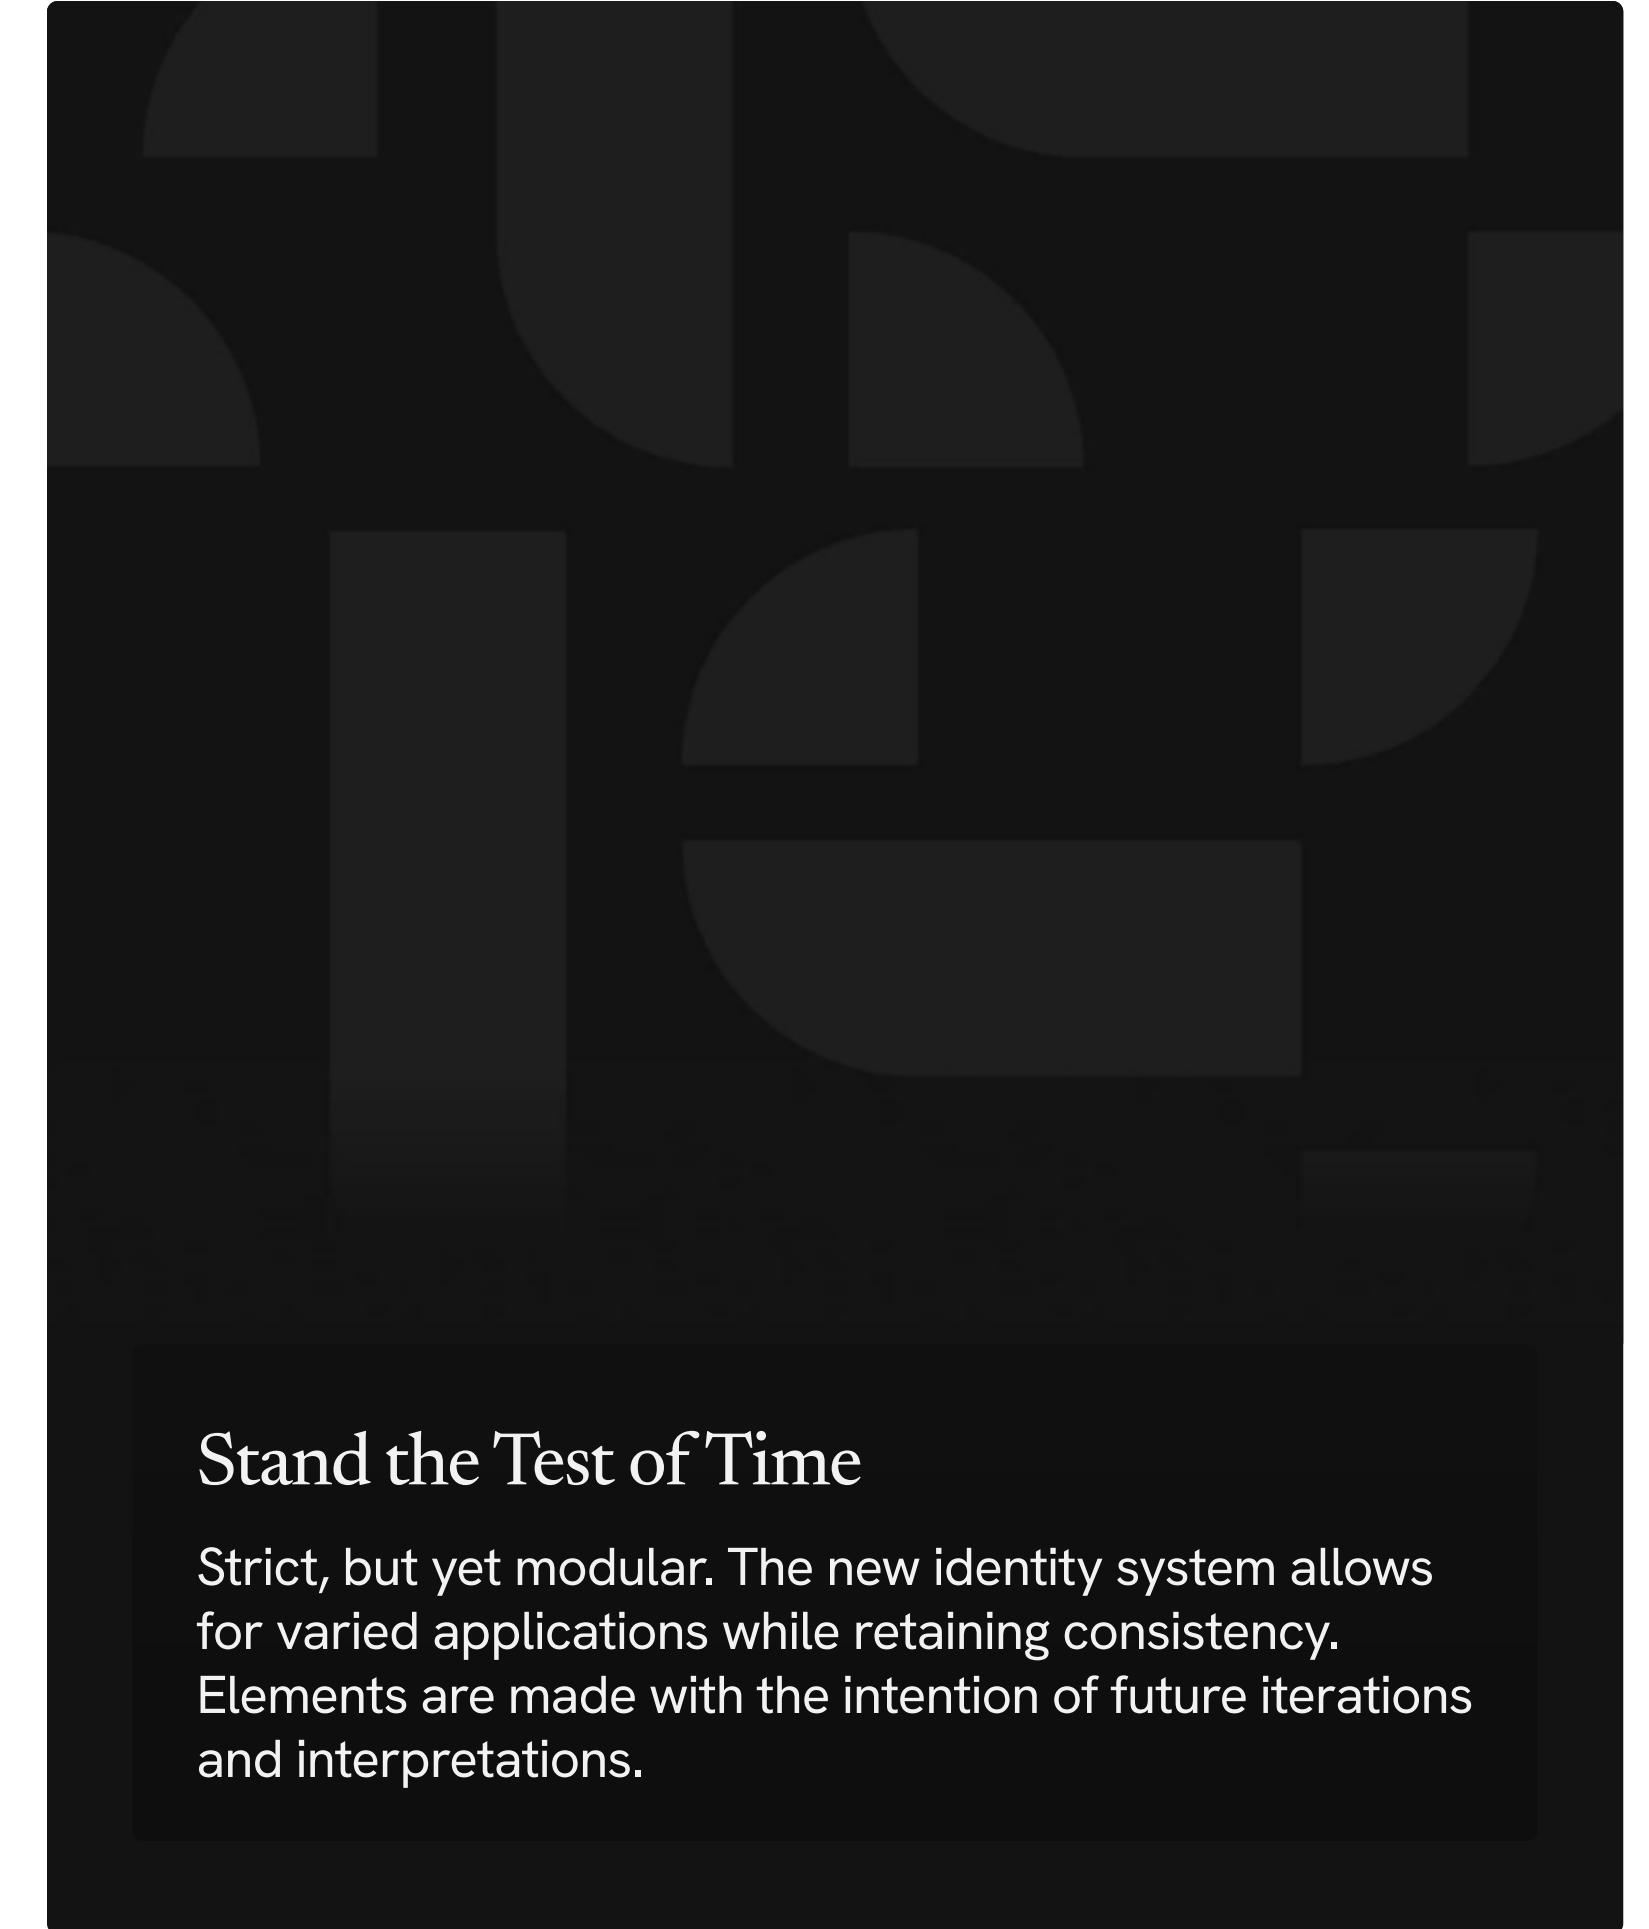

## Built on It's Foundations

The Caroll's building currently houses the School of Informatics and Creative Arts at DkIT. Previously built as a cigarette factory for PJ Caroll's, it's commonly recognised as one of Europe's best examples of modern industrial buildings designed in Miesian style.

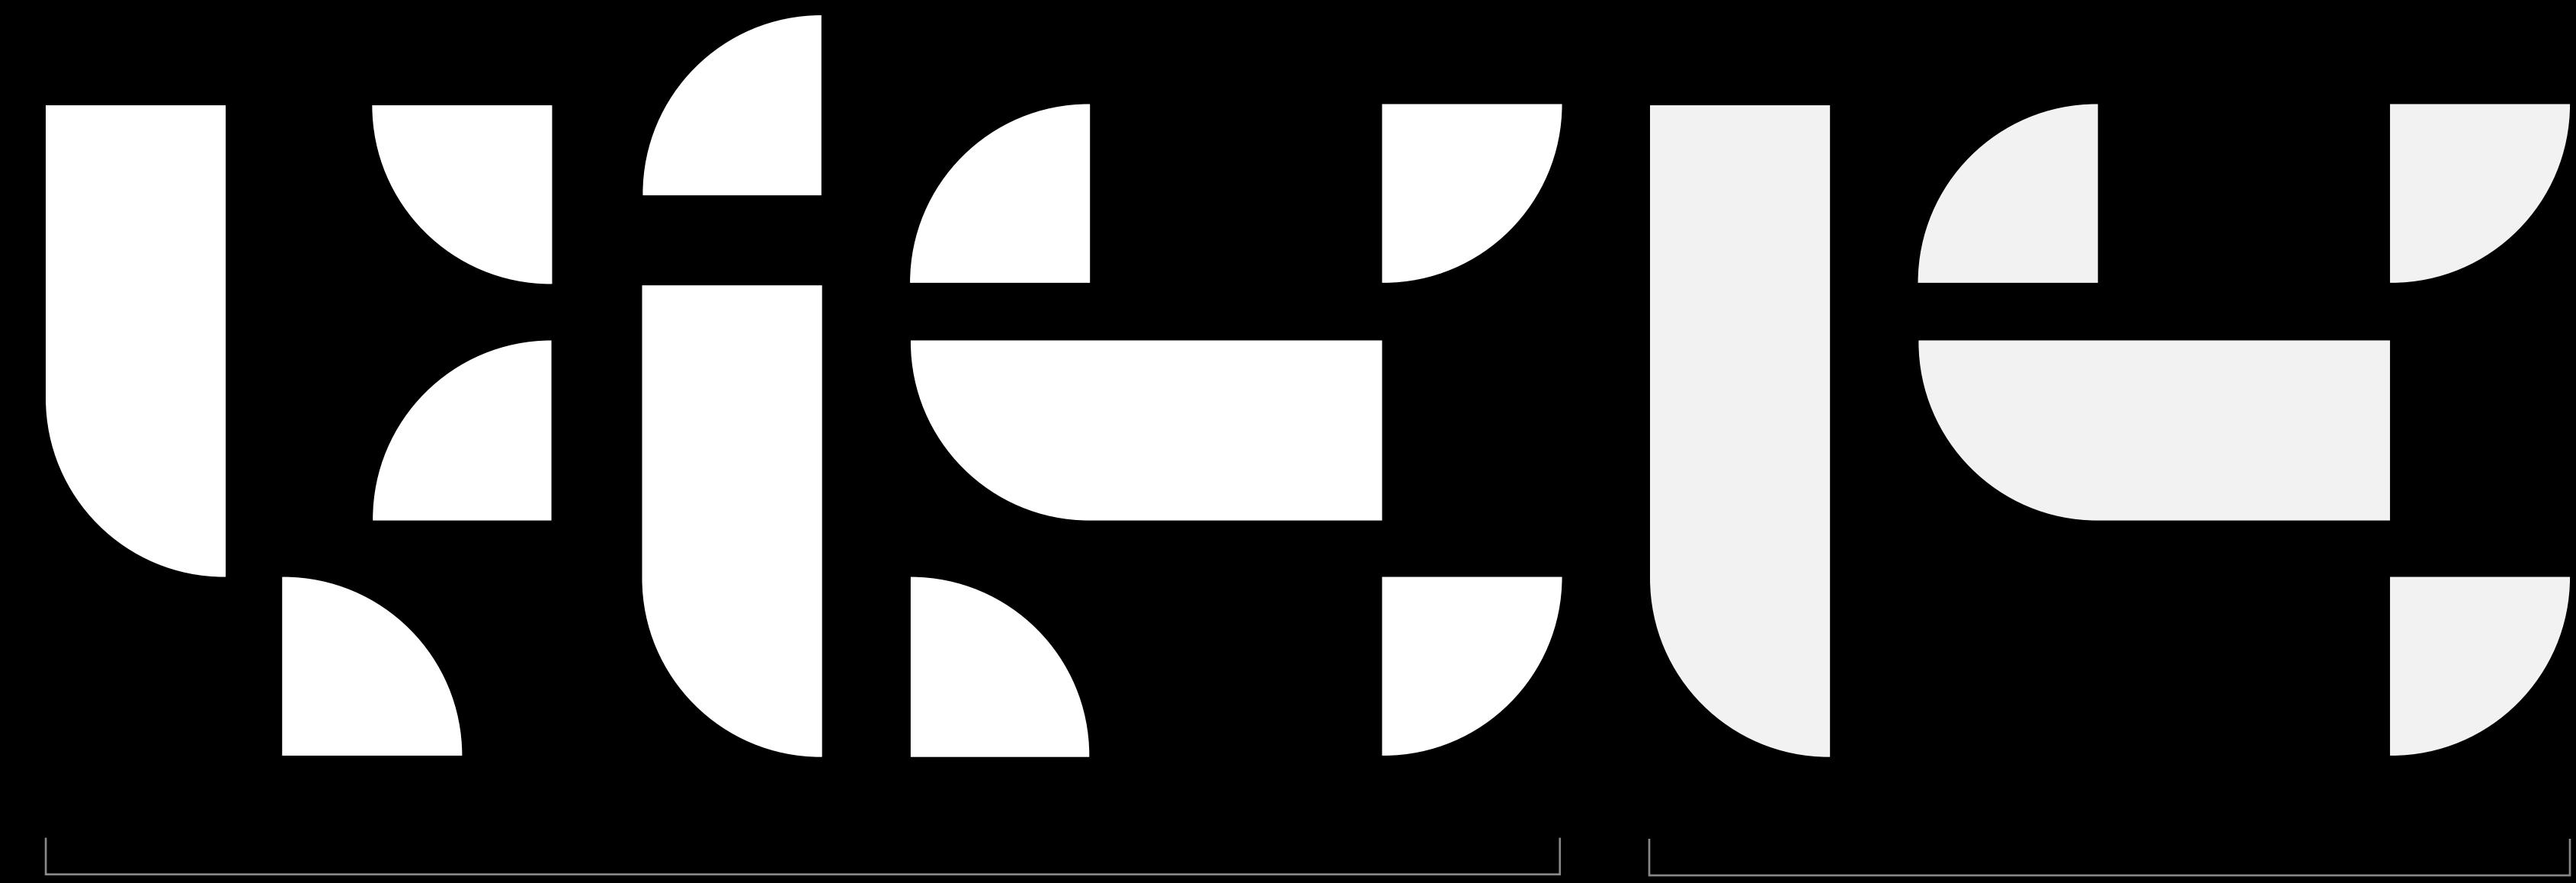

## Bound by History

Built with strong notions tied to the institution's history, the new identity features a brutalism-led approach complemented by a tight grid system and strong typography inspired by the work of Swiss Style Josef Müller-Brockmann and the Swiss Style

## Stand the Test of Time

Strict, but yet modular. The new identity system allows for varied applications while retaining consistency. Elements are made with the intention of future iterations and interpretations.
